F 8

1 of evacuations - and

1 of Bloodletting.

This remedy is indicated by this in all acute fevers which occur suddenly by the sudden suppression of the ^{natural} discharges

by the pores - bowels - and kidneys.
2 By the habits of the persons affected - being generally the young - and robust - and by the prolonged course of fever for

if the fever be seated in the blood vessels, and depends upon a morbid sensibility ^{or strength} being excited in them, - if the blood be one of the principal stimuluses of animal life - whether it act by distending, or specifically stimulating the blood vessels - then certainly

✓ Its operation is as immediate,
& natural
as the abstraction of a particle
of dirt, from the eye to cure
an ophthalmia when it arises
from the cause.

64

the Abstraction of a part of this blood, must ~~give~~ tend much to lessen, or subvert the coagulable action which takes place in the Arteries in inflamm^y fever. —

3 Blood letting is indicated by the relief which rupture of the blood vessels w^{ch} takes place from the quantity and impetus of the blood in inflamm^y fever.

Let no One call Bleeding an Unnatural remedy. — It is one of ~~the~~ the specifics of nature — ~~the~~ But in the use of it, the ~~is blood~~ often does more harm than good. She often attempts to relieve herself by pouring forth blood thro' a ~~rupture~~ ~~rupture~~

[Faint, mostly illegible handwritten text in cursive script, likely from a 17th or 18th-century manuscript. The text is written on aged, stained paper with significant water damage visible in the lower right quadrant.]

65

blood vessel in the lungs - brain - liver
or bowels. - And where she finds but
an outlet thro' the nose, the
quantity discharged is too little to do
any service, or ^{as white p. 3.} too large ^{so} as to do
mischief. - Artificial bleeding from
a vein is to be preferred to natural
discharges of blood, in as much as we
can choose, the ^{when &} time - ~~the~~ place ~~where~~
& ~~the~~ quantity of drawing it, and
may at all times regulate its quan-
tity by the ^{degrees of action in} force of the arterial
system. -

This noble remedy has undergone
much slander in all ages & countries.
It has ~~been~~ ^{been} ~~regarded~~ ^{regarded} ~~as~~ ^{as} ~~unsafe~~ ^{unsafe} ~~and~~ ^{and} ~~unnecessary~~ ^{unnecessary}
and a shameful recommendation to the

V Plethora is the effect of debility, or
of a relaxation in the blood vessels,
of course it is more necessary in ~~some~~
habits previously debilitated, ~~by causes~~
than in persons of robust habits,
just as it is more necessary to throw
over a large part of the cargo of
an old & weak vessel in a storm,
than in a new & strong vessel.
Safer in weakly people than vomits or
purgings - or low diet - They die under all,
from muscular exertion.
Who bleeds strong persons 24
see White 48 49 & excellent?

Upasious

66

fear of the great, have all combined
~~as~~ against it. — I shall briefly
enumerate the circumstances which
have been supposed to forbid it.

1 ~~great weakness~~. This, when of
the ~~indirect~~ kind is removed by ~~bleed~~.
& when weakness is of the direct kind
bleeding is often necessary to reduce a
~~disordered~~ morbid excitement in the blood vessels.

2 being born & having lived in a warm
climate. This is so far from being an objec-
tion to ~~bleed~~ — that it often renders it more
necessary. I think I have lost patients
who have ~~see~~ been subjected to this
error. —

3 warm weather is supposed to forbid
~~bleed~~. — Dr Sydenham & Dr Willan tell

It is proper in hot climates.
see Coughs. Desportes uses it
especially in the yellow fever. The
latter says speaks in the fevers of
Nov^r 1732 to May 1793 - of the hardness
of the pulse" p: 33. He complains
of an ancient prejudice of the air
the Rheumatism "en regardoit la flegme
dans le Rhume comme meurtrière",
& from the neglect of it, it falls on the
Lungs & produces Abscesses. p: 35.
He bled "copieusement" in the fever
of 1793 p: 40.

is that the most inflam^y fever occur
in, & succeed hot weather. & I have pre-
scribed it in our hottest seasons with
success where it has been indicated by the
state of the pulse. ✓ — Connected with this
objection is the regard which some
Physicians shew to the day days by
never bleeding until they expire — I
can never forget the ^{dislike & aversion} ~~pity & indignation~~
with which I viewed one of the Physicians
of our city on the 2nd week of Sep^r.

¹⁷⁹³
~~Last year~~, ~~where~~ after advising him
from an ant^y of my success,
to bleed in the yellow fever. "No Sir
said he — I will not bleed before
Cold weather". He adhered to his
resolution, and ~~was~~ ^{strictly} added to the
mortality. He adhered to his resolution,

5th
✓ The fourth or 5th day in Mercury
is said to forbid it - not so if it
has been used on the 1st or 2nd - and
even where it has not - has often
saved life

and ~~was~~ notwithstanding he confessed
that he was unsuccessful by the
Use of Bark & Wine. —

4 The afternoon is supposed to be
^{the} improper time for V.S. — I know of
no objection to this time, except the
risk of an orifice opening in the night,
which may be easily prevented by a
loose bandage. — ✓

& old age is said to forbid V.S. — so far
from it — the indolence, & increase of
appetite in old age, & above all the
^{translation} ~~concentration~~ of the strength of the
muscles to the arterial system (manifested
in the pulse) all indicate V.S. to be
more necessary (scatis paribus) in
old, than ⁱⁿ middle aged people. —

bro't from p: 72

13 Pregnancy is said to forbid U.S. —
No distention makes it more necessary
evidenced in yellow fever and in
Plurisy in His, Hisley — ^{1783 month} *Shiller's*
Cases. — _{11 times in 7 days.}

14 The long duration of a fever
supposed to forbid it. No — I have
told in 7 day of Plurisy, and in
Cameron's boy's Case — suggested
by black ^{in's} case. In tumors in
Mrs. Davis — in Davis

15 Tumors & convulsions sup-
posed to forbid it? — no Davis's

69
Infancy is supposed to forbid V.S. — ~~It~~
~~so far from it,~~ ^{like} old age it indicates it from
the great disproportion between this
egesta than egesta. Dr. Dinehambled
in the Drooping Cough & in Dentition.
— I have followed his example, & have
bled as freely in the inflam^d fever of
infancy as of middle life. — I once
bled a Child of 3 months old in an
fever with a tense pulse, & difficult
breathing three times. Its blood was
as viscid as it is in grown people. ✓
^{see Obj^m under phlogia — in women}
But the season of menstruation is
said to forbid V.S. — So far from it,
~~the system~~ it is more necessary at
this time in an inflam^d fever

Case by Dr. Physic - Cameron's boy &
Katharine's girl. — all better than
y^e respiratory of much - Blister &c —

& mine. Mrs. Henry & I Waggaman
sweet after death from two little Ws.

than at any other, for the Arterial
 system is ^{plentiful} more ^{more} excitable at the
 time of menstruation than at any
 other. what can the discharge of $\frac{1}{3}$
 or $\frac{1}{5}$ of blood from the Uterus do in
 a fever which requires the loss of
 50 or 300 to subdue it? —

The vital fluid has further
~~many diseases are supposed to~~
~~been fortified and defended by improp-~~
~~erly called &c. — e.g. the &c. &c.~~
 —ing certain names upon diseases.
 e.g. &c. is said to be improper & even
 fatal in the fevers improperly called
 putrid & nervous — also in the
 purpurile fever — in the Scabiosa
 anginosa — and in all those diseases

th 0
V Disordered blood & the absence of an in-
-flamed Crust on its surface are said
to be objections to the repetition of
V.S. - I shall hereafter teach you
that ^{the former} ~~they both~~ indicates the highest
degree of inflamed diathesis, & that
these are ^{signs in the blood} ~~other~~ ^{marks} of inflame-
d action in the system, more ~~the~~ violent
than that which is taking from its
syrinx. - ^{they are the loudest call for V.S.} of course that neither of
the above ~~cases~~ circumstances in the
blood forbid the repetition of V.S. ^{it}
^{arises from palmy of the veins. See Mitchell.}
If a disposition to faint has been
urged as an objection to the repeti-
-tion of V.S. - To far should it be

which have been designated by the
 name of Nervous. I have repeatedly
 broken thro' all these barriers of
 truth & humanity, & have prescribed
 V.S. in fevers called putrid where pete-
 -chiae have appeared on the body - in
~~some~~ fevers called Nervous, after the
 10 - 15 & 20 days in the puerperal
 fever, in the Scarlatina, and in
 Hysteria - Epilepsy & many other
 diseases of the Nervous System. ✓

I shall now mention the advantages
 of V.S.

1 When used on the first hour
 & sometimes first day of a fever, it
 strangles it in its forming state.

from operating in this way, it should
encourage us to repeat ^{it}, for it is often
the effect of great indirect delirium.

13 Reechie

12 vs: it is said renders a habit of vs.
necessary every year. This is not true,
provided vs: is used only in cases of
morbid action in the arterial system. +
see p: 76 + ^{Op: 69}

~~To these objections to vs: an ignorance~~
of the quantity of the blood contained
in the body, and of the quantity which
has been taken or lost by design
or accident, has contributed very
much to ~~prevent~~ encourage prejudices
against vs: — ~~But~~ There have been
many disputes about the quantity
of circulating blood in the body.

72
2 It gives ~~imparts~~ strength to the system, by abstracting stimulus in cases of indirect debility.

3 It prevents the termination of ~~fever~~ ^{the} inflammation in the gangrenous, or ~~in~~ chronic states of fever. This ^{is induced by a constant pain see this proc: p107}
4 It renders convalescence more speedy, & more safe than it is ~~without~~ in any other mode of cure. —

5 It prevents all those numerous chronic diseases which fill our nomenclatures of medicine. Coughs, hemorrhages, consumptions, obstructed viscera, anasarca - agues, dropsies - jaundice - hydrocephalus internus, and the whole train of nervous diseases are frequently

pounds.
From 25 to 30 in a person of a
middle size. I believe is now agreed
up to be nearest the truth. —

McLine drew 320 } in 20 days
from a patient in the Thomas's
hospital in a contraction of the
head. But this quantity is ^{small} trifling
compared with the quantity lost by
~~see~~ a number of persons whose cases
are recorded by Dr Haller in the 25
pages of the 2nd Vol. of his Elements
Physiologie. I shall mention a few
of them. A ^{person} young woman lost 10
of blood from her nose — and another
10 from the same at one time.

the effects of those congestions, and
effusions, and eruptions of vesicles
which follow the neglect of D.S.
in fevers. — Three fourths of the
Chronic diseases we meet with I
believe are created like what are
called putrid & nervous fevers by the
ignorance, timidity, or ^{obstinacy} ~~timidity~~ of
Physicians in the treatment of the
inflamed state of fever. — It cures with
out alarming the only fear of the patient &
friends of is — ^{the least} ~~the least~~ ^{not death} ~~not death~~ —
I proceed now to mention some
circumstances ^{we} should regulate
in the use of this remedy. ^{plainly}

1 The quantity to be drawn. ^{bring in 76. & 28} This
should be determined by the state of the
pulse. — a depressed pulse ~~is~~ ^{below, or intermit} pulse

~~and the~~ ^{in 5th}
another 18 - another 22, all from
the nose at one time. A person
discharged this of blood by vomiting
in one night. Another 422 from
the lungs - a gentleman at Angola
lost between 3 and 6 pounds daily
from his nose, - to cure it he
was bled 97 times in one year.
a young woman was bled 1020 times
in 14 years to cure a plethore^{ch};
disposed her to hysteria. a young
woman lost 125 ounces of blood every
month. To cure it, she was bled
every day, and every other day for
14 months. In none of the
instances which I have mentioned

occurring in the beginning of pestilential
 yellow fever &
~~or~~ ~~some~~ ~~forms~~ as plague, small pox,
 - also the synocha the synochela - the
 synochoid & even the typh pulse all indi-
 cate V.S. ~~But they indicate more or less~~
~~according to that~~ ~~but they~~ The body of a
 man of common size contains 50 lbs
 of fluids - 25 of which are said to be
 blood. One half, or even $\frac{2}{3}$ of this blood
 have been discharged by natural hemorrh-
 -ages without loss of life - Artificial
 V.S. has in some instances drawn nearly
 that quantity. I have drawn 8, 9, & 10
 pounds in several cases, and in every
 case of these large bleedings recovered any
 patients. I have ^{also} taken 150 ounces

was death the consequence of these
great evacuation of blood. ~~On the~~
^{all the persons alluded to}
consequently ~~they~~ all recovered.
see White. p: 147. 148.

Again - an ignorance of the rapid
manner in which blood is regenerated
when lost, or drawn, has contributed
to encrease prejudices against V.S.

- I have admitted the quantity
of blood in the body to be from 25
to 30 pounds. But what shall we
^{more than} say to ~~double~~ that quantity being
lost in the course of 62 days in
one instance, & 10 in another? a
pound lost (Dr Haller says) ~~is~~ ^{is} ~~the~~
^{the} of blood daily from the hemor-
rhoidal vessels for 62 days, and

of blood in 24 days from a man, this
at 12 bleedings. ~~he~~ is now leasing a farm
year, ~~but the same quantity at 15 bleedings~~
for himself in north County. The
~~in a day. It is now in thirty days~~

prejudices ~~was~~ against drawing a large
quantity of blood where it is indicated are
founded in false ideas of ~~the~~ the animal
economy. ^{see white p: 44 Introduction} - The following circumstances
should influence us in the determining
the quantity of blood to be drawn in inflam.
fever. ^{see p: 24 on phlogia.}

The danger to vital parts of Congestion,
inflamⁿ - effusion or Abscess. This danger
is indicated by ~~the~~ most commonly ~~by~~
pain - but there may be congestion in
the liver & bowels, & even in the
head without pain; the quantity of
blood drawn should be proportioned

another ~~to~~ 1/5 of blood in 10 days.

The loss each day was supplied by fresh quantities of Aliment.

+ But further - An ignorance of the State of the System when the blood vessels are under a morbid state of excitement & excitability has served to favour Objections to ~~the~~ in ~~in~~ - flame fevers. - The one of the uses of the blood is to stimulate the ~~arterial~~ ^{blood} vessels and thereby to promote animal life. In a healthy state of the vessels the whole mass of the blood is necessary for this purpose - But in this State of morbid excitability very

to the danger to which these viscera
are exposed. In cases of considerable
fever & even tension of the pulse, where
the viscera are safe, & it may be
moderate, and the arterial system
may be left to wear itself down by
time, especially if V. is exposed by the
patients or his friends. ^{to moderate of}
The pulse Chinese - ^{see p 27} ^{plainly.}

2 The prevalence of an inflam. con-
stitution of the air will render
V. more treacherous than at other
times. This disposition in the
air to produce inflam^{copious} diathesis
was remarked by Hippocrates,
& has been accurately described

little blood is required to keep up
the Action of the Vessels - just as less
heat is necessary to promote an
agreeable warmth in a fever than
in ^{a healthy} ~~another~~ state of the System, or as
^{very} small portions of light and sound are
sufficient to excite vision & hearing
in an inflamed, or highly excitable
state of the eyes & ears. —

Just so with Physic. —

In a highly inflamed fever in
which the blood vessels are all in an
^{an} inflamed or morbid state of Excitation?
I think it probable that 100 of blood
would act with as much force
in keeping up the motions of life,

by Lydenham, Thurham & Cleghorn.
So greatly did it predominate at one
time in ~~min~~ orca, that D Cleghorn
says the pain of a broken limb
produced an inflammation. ~~Lydenham~~

This constitution of the Air exists
independently of its heat, cold, or any
other of its sensible qualities. It
was ascribed by D Lydenham to
a mineral effluvia from the
bowels of the earth. This opinion
was an approach towards the
truth. I hope hereafter to prove
to you that, it arises from an
overproportion of Oxygen in the

as the whole to 30 in a healthy
 state of the blood vessels. ^{as a little}
 light serves an inflamed eye, as a little ^{light}
 serves an inflamed arterial system.

Hear these facts ye timid, &
 ignorance of Authors who used it. White's p. 5 ^{Hydriargyrum}
~~ye indolent, and ye the prejudiced~~

Diemerbroeck - more so

enemies of V.S. and blush at your

ignorance of the principles of
 medicine as unfolded by Physi-

ology, and pathology! — Then
 these facts;

then — I say again — and ask per-

— Don of the friends of those patients
 whom ye have destroyed by the
 neglect of that noble & I had al-

— most said infallible remedy for
 fevers of too much action! —

I have charitably omitted the

Air exhaled not from the ~~lungs~~
 but from the Ocean - Rivers &
 the Vegetables. - The such a con-
 -stitution ^{of the Air} as I have described here
 prevailed in this City, & in many
 parts of the United States for two years.
 1793 - 1794 - 1795
 past. It has given all our Diseases
 a most inflamed Cast. Int. & Ex.
 Intermittents have all been more
 or less inflamed. & have required
 V. to cure them. Even the puerperal
 fever, & the even the Scarlatina Anglica
 have both been highly inflamed &
 have required V. - In such seasons
 V. should be more copious than

Objections to V.S. in some Physicians
to ignorance & fear. — But if they
originate in Unkindness or hostility
to a man who never injured one
of you, and who wished you to
share with him, — may more to
take the lead of him in his inqui-
ries in ~~medicine~~ — then let me
in a more solemn tone, and
call upon you — to ask pardon
ask you to pause and reflect upon the
of God ~~for neglecting~~ to use this
consequence of neglecting
invaluable remedy! What tho'
the dead tell no tales, — and tho'
your patients be deceived by the
false names you give this power
when you withhold the lancet,

79
at ~~other seasons~~ and it should be
used in diseases which in common
seasons ~~is~~ forbid it. A Christian who
~~disregards~~ the agency of divine provi-
-dence in human Affairs, does not
act more absurdly, than a Physician
who neglects to attend to the influence
of the Atmosphere upon diseases
in all his prescriptions. —

3 In drawing ^{intercolony} blood, the Quantity ta-
-ken at a time should be large
or small according to the state of
the system. In cases where the
pulse acts with force and freedom,
from 10 to 20 ounces of blood

yet be assured, the time, the awful
time will come, when you will
answer ~~at~~ ^{unto} ~~for~~ ~~your~~ at the bar
of God for your ^{conduct} disingenuous and
conduct.

It has been said that the yellow
fever is beyond in violence the
force of medicine. no - it is not - provided
our principles & experience lead us to it
beyond violence. Probably loss of blood
in such cases would keep up the actions
of life.

12 It is patient grow worse after it.
Yes - & many lives lost by this mistake.
Patients often apparently worse, &
yet really better after many remedies,
as vomits, purges &c - to be worse
only from too small quantity, or performed
in an improper manner.

may be drawn ⁸⁰ at Once, but in case
of great ~~ind~~ indirect debility, where
the pulse is depressed, it will be better
to take only a few ounces of blood
away at a time, & to repeat it three
or four times a day. ^{By this means fainting & terror} You will
see my reasons for this Advice at
full length, in my printed Acc^t of
the yellow fever. — In an inflam^y
^{fever} whose Character is not accurately
known, begin with moderate bleeding,
& increase ~~it~~ it in quantity, and
frequency, according as the relief given
shall make it necessary. — In this
way I ^{treated} ~~overcome~~ the yellow fever of

I am very sorry to hear
 that you are not well.
 I hope you will soon
 be able to go on with
 your work. I am
 very much interested
 in your progress.
 I am, dear friend,
 your sincere friend,
 Wm. Lloyd Garrison

1794.

51

the present year. In ~~one~~ case I took
 42 ounces of blood from a woman
 at 3 bleedings,
 in seven hours, she would probably
 have sunk under the loss of half that
 quantity at one bleeding. —

4 A regard should be had to ^{Disease &} the habits
 of a patient with respect to Ves. —
 persons who have been subject to
 inflam^d p^{er}sons, & who have been relieved
 by Ves. ^{require it more} ~~was~~ it better than other
 people.

5 Regard sh^d be had to the Country
 from which persons have lately
 arrived who are affected wth inflam^d
 p^{er}sons. From a neglect of this I
 once saw in London a Pleurisy

1784.

The present year. In the case of
the number of those known a woman
in the world. The world probably
have been under the loss of half the
quantity of our labour.

It is again thought that
of a distance with respect to
persons who have been obliged to
return home I who have been
by the way of it from the

world. I repeat that the number
from which persons have been
among who are affected in the
house. There is a report of this
and in the world.

82
end in Empiema & Abscess ^{in the lungs} in an
American Captain from the War of
1812. He was attended by the
celebrated Dr. Latham. Persons coming
from Sea, or from the Sea ~~coast~~ ^{shore} are
more ~~but~~ disposed (from inhaling
the oxygen of the Ocean) to inflame
faster than other people. The man
from whom I took 150 ounces of
blood in six days last summer, had
just arrived from Great Britain.

— turn over — to 6 p: 83
So much has been said about the
proper place from whence blood sh^d
be drawn. Formerly Ven. in the feet
was much used by way of exciting

V Under this head, I shall decide upon
cropping in the inflam^y state of ~~fever~~^{fever} -
where an inflam^y fever originates from
local affection as from contusion in
the head or breast, it is useful, but
where topical affection is a symptom^{only}
or an effect of general fever, it can
seldom be necessary, except bleeding
from the Arter has been omitted, or
used too sparingly in the beginning of
a fever, by which means such ^{bilal} congestion
has taken place as cannot be removed
by general bleeding. - go to 8/p. 87.

see Indian mode of taking
down inflam^y action.

83

a venous from the head, but our present ideas of the Circulation of the blood have taught us that, it may be drawn with equal Advantage from the Arm in nearly all Cases. To V. in the foot there are the 3 following Objections. 1 The difficulty of placing a patient ill with a fever in a situation favourable to it: 2 The danger of wounding a tendon, & 3 the impossibility of seeing the state of the blood after it is drawn, for in this mode of bleeding, the blood generally flows into a basin or pail of water. — V

6 — The appearance of the blood fur-
-nishes much information as to the

V that these appearances will be
regarded no more than the appearance
of the Urine. a fever is a voyage
bleeding is rising sails &c

+ The blood of old people ~~sooner~~
putrefies than of young - owing
to more ^{grand} tension & action.

Dr Physick says his ^{grand} father always
had dense blood - died above 80.

State of the system, & the indications for repeating vs. - I shall briefly enumerate these appearances. Altho hereafter I hope the pulse will so much govern in vs.

1 Dissolved blood - indicates the highest degree of inflamm^y diathesis. It ~~often~~ sometimes occurs in the plague, yellow fever, the small pox, & I have ~~seen~~ occasionally seen it in Plurisy in the Spring of the year. ^{If it appear} ~~On~~ the first day of ~~the~~ a fever, it may be repeated, and the dissolved appearance will gradually wear away, & be succeeded by more natural blood, but if it appear late in the disease, no advantage will arise from the repetition of vs. - It arises from ^{is decomposition} ~~is decomposition~~ ^{paucity of the veins} ~~is decomposition~~

2 Dense blood of a scarlet color with out any separation into crassum & serum.

[Faint, illegible handwriting throughout the page]

This indicates ~~the~~ a high ~~degree~~^{1st} perhaps
the 2nd degree of inflamm^y action. It occurs
in the plague, the yellow fever, & the
^{petechial} small pox.

3 ~~Dense~~ dense crapsamentum, and
yellow serum - the former sinking to
the bottom of the cup. ~~+~~ - This indicates
~~a 3rd grade of inflamm^y action.~~

4 Dense crapsamentum floating in
^{transparent} yellow serum, with a precipitation of
some red & fiery particles of blood
at the bottom of the cup. ~~+~~

5 The crapsamentum of the blood
sometimes surken, & sometimes
floating in the serum, but so much
of it dissolved in the blood, as to give

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

86

the fever a red color, & from hence
to give to this appearance of blood the
name of Lotura Carnium.

I am unable to determine the
exact degrees of inflamⁿ indicated by each
of these 3 ^{last} appearances of blood. ^{last}

Perhaps, they are all varied by the cir-

-cumstances of ~~presence~~ a moderate or

violent exacerbation, ^{of fever} or in which the
by the size of the stream of blood or
blood is drawn, by the heat or color of,

by or the form of the cup into which
the blood flows. ~~the a large stream, &~~

~~a drop~~

6 Sto rixy blood, i.e. blood with a white
bubbly coat. - the more the crapamentum
appears in the form of a cup, the more
inflamⁿ the fever. This appearance of

the blood occurs & in Pneumony - acute & chronic - in Rheumatism acute, and chronic, & in all other inflamm² ~~diseases~~ ^{states of} fever from the insensible qualities of the Air. It occurs too in mild cases of putrid - entral fever, and in the close of such cases as have been violent. The appearance of this Buff on the blood in the yellow fever instead of alarming, has always encouraged me. It proved that the f^d disease was tending from an uncommon, to a common degree of inflamm². Diathesis.
return to 7. p: 82 -

8th. In what posture should the body be placed so as to obtain the greatest advantage from V.S. ? I answer that in cases of great indirect or direct debility

where danger may be apprehended from
 fainting, the blood should be drawn in a
 recumbent posture, but where the pulse
 is full & tense, & where fainting can do
 no harm, but may do good by suddenly
~~abstracting~~ suspending the ~~most~~ morbid
 action of the blood vessels, & thereby equalising
 the excitement of the whole system, in
 this case the patient may be bled in
 a sitting posture. I suspect that ~~bleeding~~
~~will in general~~ I suspect (contrary to Dr
 Cullen, & to what I formerly taught)
 that the greatest advantage is to be
 derived from vs. ~~not~~ ~~lying in~~
 cases (where mischief from fainting
 is not apprehended) by drawing the
 blood not only in a sitting, but in a
standing posture. The ~~notices~~ are hereby

✓ It cures without admitting
those distressing & terrifying symptoms
to take place in fevers which occur
without it even where the patients
don't die.

* There being in the Advantages of
occasional & in preventing apoplexy,
& other chronic diseases. B. Sims' case,
of also its use as an Alterative
in diseases of fulness &c - why not
as well as diet, or ~~for~~ Antimony?
also sore legs, from its effects in

48
more compressed, & the nerves placed in
a more favorable situation to abstract
marked excitement from them.

I have been much struck just
with the following fact. That Altho' I have
known fainting often to succeed wth yet
I have never known death to occur ⁱⁿ ~~from~~
~~this~~ a fainting fit thus induced in the
whole course of my life. This is
the more remarkable as I have often
seen death induced from fainting, from
other causes, as fear - paroxysms -
&c. — V

How long the present fears & prejudices
upon the subject of w^d shall continue
to render ~~from~~ one of the principal
outlets of human life I know not.

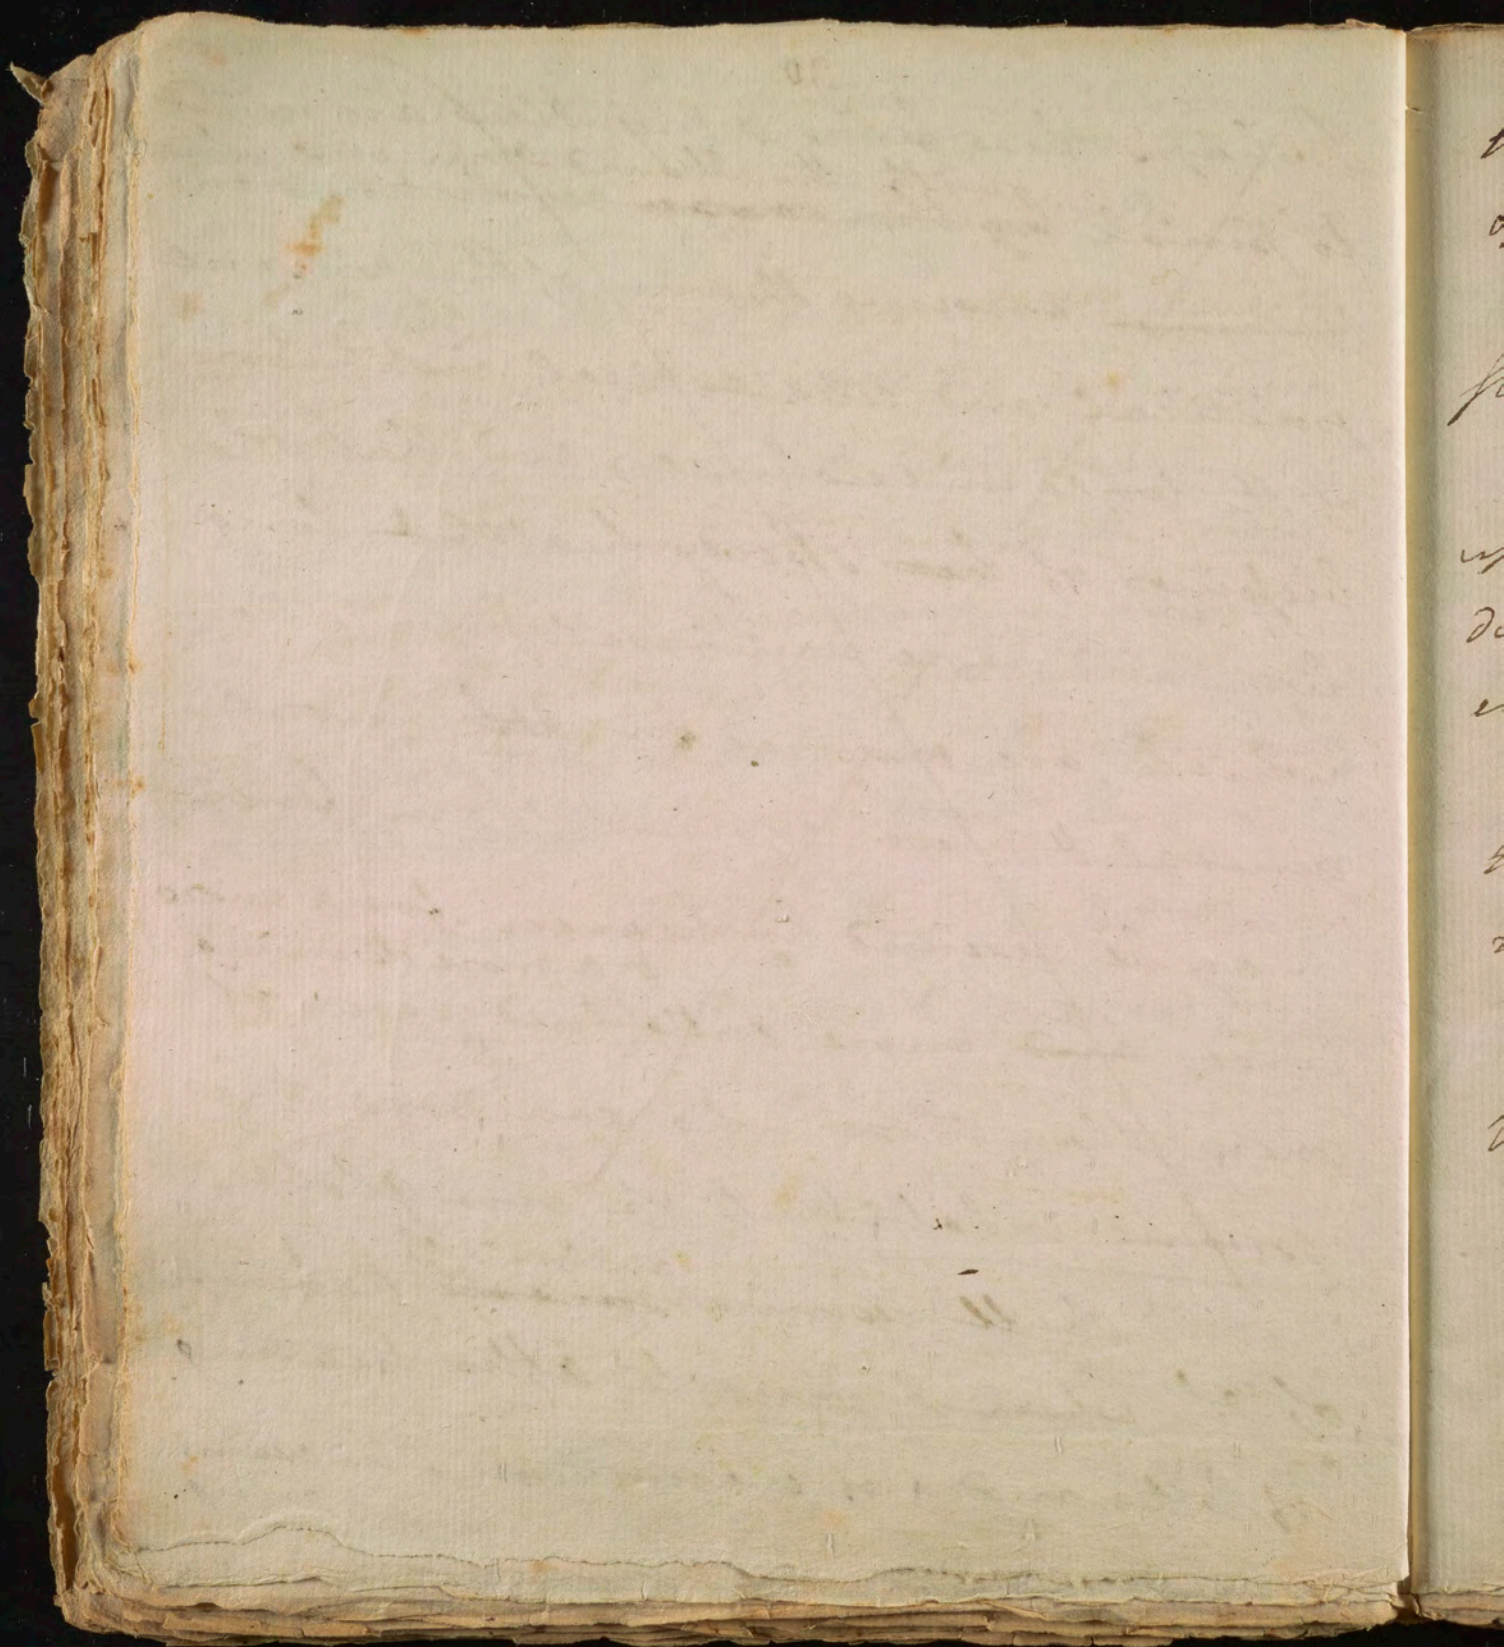

Phlegmatisms white p 110 - 111
small pox ^{by Desfont} - ^{white} 113 King Lewis 14

Perhaps these fears & prejudices are removed
 to perish ^{with the absurd opinions which} ~~by the same~~ revolutions in
 the minds procure many of the present
 political and ecclesiastical institutions
 of the world in existence, and that the
 blessings of ~~long~~ speedy health & long
 life - and more universal population
 which are ensured by ~~the~~ more
 general & more copious ~~res.~~ in fivers,
 may be secured by heaven for a more
 wise, ^{& a more deserving} and more enlightened ^{and} race of
 men, than those who compose the
 present inhabitants of our globe.

I shall resume ^{an acc't. of} ~~some of~~ the benefits
 of ~~res.~~ ^{an acc't. of} when I come to after treating
 of other modes of evacuation, in exami-
 = ring

91

the comparative advantages & disadvantages
of each of them. —

2 of Purgings in the inflam^y.
state of fever. —

The necessity of this evacuation is founded
upon the stimulus of the faeces from their
distending the bowels, or from their acrimony
increasing the fever. —

Its advantages consist in its reducing
the pulse when too full or tense, and in
raising it, when depressed by great indis-
cumbent debility. — It likewise disposes in some
fevers to perspiration. —

The ~~purg~~ Bowels sh^d be moved 2, 3
times in 4, or 5 days according to the violence
of the fever, or the morbid contents
of the bowels. —

The purges should be active, or

[Faint, illegible handwriting on aged, yellowed paper. The text is mostly obscured by fading and bleed-through from the reverse side.]

[Faint, illegible handwriting on the right edge of the page, likely bleed-through from the reverse side.]

92
benient according to the state of inflam:
action. I shall hereafter specify such
as are proper in the Different states of
fever. —

1 Vomiting

The effects of vomiting in inflam:
fevers are 1 to discharge the morbid
Contents of the Stomach. 2 To determine
to the Surface of the body 3 To debilitate
the system by means of these two excre:
-tions, and probably by the ^{leper} to dissipate
morbid excitement by the muscular exertion
required in Vomiting. 4 To equalize
the excitement of the system by
abstracting its ^{excess} from the blood & ^{repels}
throwing it into the alimentary canal
& muscles. —

V This is evident by the exp^t made
on grooms who ride horses. They
are reduced by being sweated many
pounds in a few hours to make them
equal in weight with ^{or} antagonists

3 Sweating.

This ~~same~~ mode of depleting the system was introduced at a time when morbid matter was supposed to ~~be~~ be the proximate cause of fever. It acts, not by expelling any thing exclusively morbid from the blood, but by reducing the system in consequence of its abstracting a portion of the fluids of the body! Since this mode of curing inflam'd fevers is still fashionable in gentel life, - for it offends no sense, and disturbs no opinion, ~~like the calomel~~ the preparations of antimony, particularly James's powder ^{is in general} ~~is the~~ ~~is the~~ use for exciting sweat. They are

Guidance. 8

It is because it is some malignant
fevers, it is ineffectual. D. Tydenham
describes a fever in which profuse
sweating did not prevent the gangrenous
state, & which he says required us to
cure it. Morgagni describes a similar
fever in which an universal sweat
was the forerunner of death. I have
seen two cases this year of yellow fever
in ^{the} one of w^h proved fatal, & the
other nearly so, from a ^{severe} relapse
being placed upon plentiful ^{spontaneous} sweats
to reduce the system.

all uncertain, & sometimes violent in
 this operation. — I object to this mode
 of curing fevers. 1 Because it is ^{unsafe.} ~~safe~~
 - The ~~method~~ & 2 Because it is uncer-
 -tain. 3 Because where it succeeds, it
 is a tedious method of curing fevers.
 - I shall hereafter ~~mention~~ speak of it in
 the only fever in which it has been used
 with success.

Salivation.

mercury - the sovereign of the materia
 medica, after having ^{subdued} ~~vanquished~~ the
 venereal disease, the Syphilis - & many
 other formidable diseases, has at last
 added to its triumphs & reputation by
 overcoming ~~influenza~~ ^{the} malignant
 or inflamed fevers. — I am to speak

compared th to sailing by means of canvas,
compared to helms.

in this place only of its ^{good} ~~salutary~~
 effects by depleting the system thro' the
 medium of the discharges of the

Salivary glands for ^{it} ~~it~~ ^{out} ~~out~~ ^{this} ~~this~~ ^{to} ~~to~~ ^{the} ~~the
~~amount~~ ^{the} ~~and~~ ⁱⁿ ~~in~~ ^a ~~a ^{day} ~~day~~. —~~~~

It Salivation acts by not only by
 discharging a large quantity of the
 fluids of the body, but by doing it in
 that gradual manner which prevents
 fainting. ~~as a distressing symptom in~~
 It acts likewise by creating an
 artificial weak part which prevents
 effusion ^{from} ~~on~~ ^{more} ~~more~~ ^{vital} ~~vital ^{parts} ~~parts~~. In
 determinations to the Lungs it is of
 eminent service from the proximity
 of the ~~salivary~~ discharge to the part
 affected. — I shall speak of the applica-
 tion of this remedy to several cases of~~

V They are discharging the waters from
a sinking vessels by the hollow of ^e hand
instead of a pump. —

all proper only in moderate degrees
of fever only.

There is an order of expedition or
velocity in the action of depletion as well
proper to be known in acute diseases.
as force. It is as follows. 1 Vt. 2 Vomits.
3 sweats. 4 purges. 5 Salivation 6 Blisters
7 fasting — for us cured in the last way
by time. —

fever hereafter. 96

Blisters

are useful in depleting from those parts which are the seats of ^{those} topical congestion - which are produced by inflammation - hence they are proper therefore to the sides in pulmonary determination - to the brain in ^{cephalic} ~~phos~~ determination, & to the joints in Rheumatic pains. The relief obtained by the evacuation in these cases, more than makes up for their stimulus, to the whole system. They are ~~useful~~ ^{to the limbs} may be useful in the weakened state of inflammation, by concentrating scattered sensations, and by producing determination from the inward & vital to the external parts of the body. ✓

Handwritten text, likely bleed-through from the reverse side of the page. The text is extremely faint and illegible due to fading and the age of the paper. It appears to be a continuous paragraph or a series of lines of text.

Thus have I considered generally each of
the evacuating Remedies used in ^{the} in-
flamed states of fever. Let now inquire
into the ~~the~~ comparative merit of each
of them. —

In moderate degrees of fever, purging
~~blood~~ vomiting & sweating may be
trusted — but they are ~~all~~ in ^{cases of} malignancy
violent action they are liable to the
following objections. 1 They are slow in
their operation. 2 They are uncertain
in their operation. How often have we
filled the stomach & bowels with Salts,
castor Oil — and even Mercury and
Salap without being able to move
them? — How often have we failed
of exciting sweats by Bed Cloathes —

V and even where they have been
excited by nature, as in Intermitents,
& Hectic fever, ^{how} seldom do they
terminate the disease? —

They are circuits, as much so as it
w^d be, to bleed - purge &c to remove inflammⁿ from
the eye instead of extracting sand — It ~~is~~ slow as much
as exhaling, instead of draining a pond. —
+ we deplete at a venture by vomiting
- purging & sweating — not so - by V. — for
we can limit the quantity discharged to
an ounce, & suit it exactly to the force of
the disease as manifested in the pulse.

Purging sometimes kills - Hippoc.

sup: 27 on pleurisy.

98
by hot Baths, and even by the least
Specific of James's powder ^{V^a}. — But 3^{ly}
Some of them are unsafe in y.
operation. How often have emetics,
produced fainting — ^{convulsions} — ^{and} inflammation of the stomach
hemorrhages of the stomach, & finally
death itself? and ~~it is~~ how numerous
are the instances in which James's
powder has produced death by the harsh-
ness of its operation when given to excite
sweat? Mr Howard & Dr Goldsmith both
perished from ~~the~~ the violent operation
of this medicine. ~~An instance of death~~
Salivation is slow, ~~it is~~ in its effects,
and Blisters are partial as well as
^{weak} in their operation. — +
Bleeding, Gent: stands foremost of

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

all the remedies that have been mentioned. 29. for the cure of inflam^g f^gness.
- It is quick in its operation. - It is under
the command of a Physician - as to the
time - quantity - and ^{the} place from whence
the blood is extracted. - It is ^{a safe} perfectly
and operation - and may be performed
with the least attendance, & with the
least disturbance to the System. The con-
- value moreover is the most speedy & the
more perfect after the use of it ^{than after} of any of
the other ~~med~~ remedies. It has other ad-
- vantages. It renders the operation of
~~promoting~~ ^{promoting} purgery & evacuating more
certain & more useful than when they
are used without it.

Such gentl: are the effects of V.S. - in
inflam^g f^gness. Do not suppose that I

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

[Faint handwritten text visible on the right edge of the page, possibly from the adjacent page.]

~~am misled in my attachment to it by~~
~~any too partial to it.~~ I have little reason
 to be so. It has cost me much obloquy,
 & what is more, it has been ^e means
 of ~~depriving me~~ ^{depriving me} of many profitable
 patients. — But I shall not, I cannot
~~I dare not~~ ^{I dare not} relinquish it. The triumphs which it
 has often ^{afforded} ~~provided~~ me over disease &
 death, form a ~~proper~~ ^{to my mind} feast infinitely
 more delicious, than all the fame, or
 wealth, ever bestowed upon a human
 creature. — ~~you~~ ^{among}

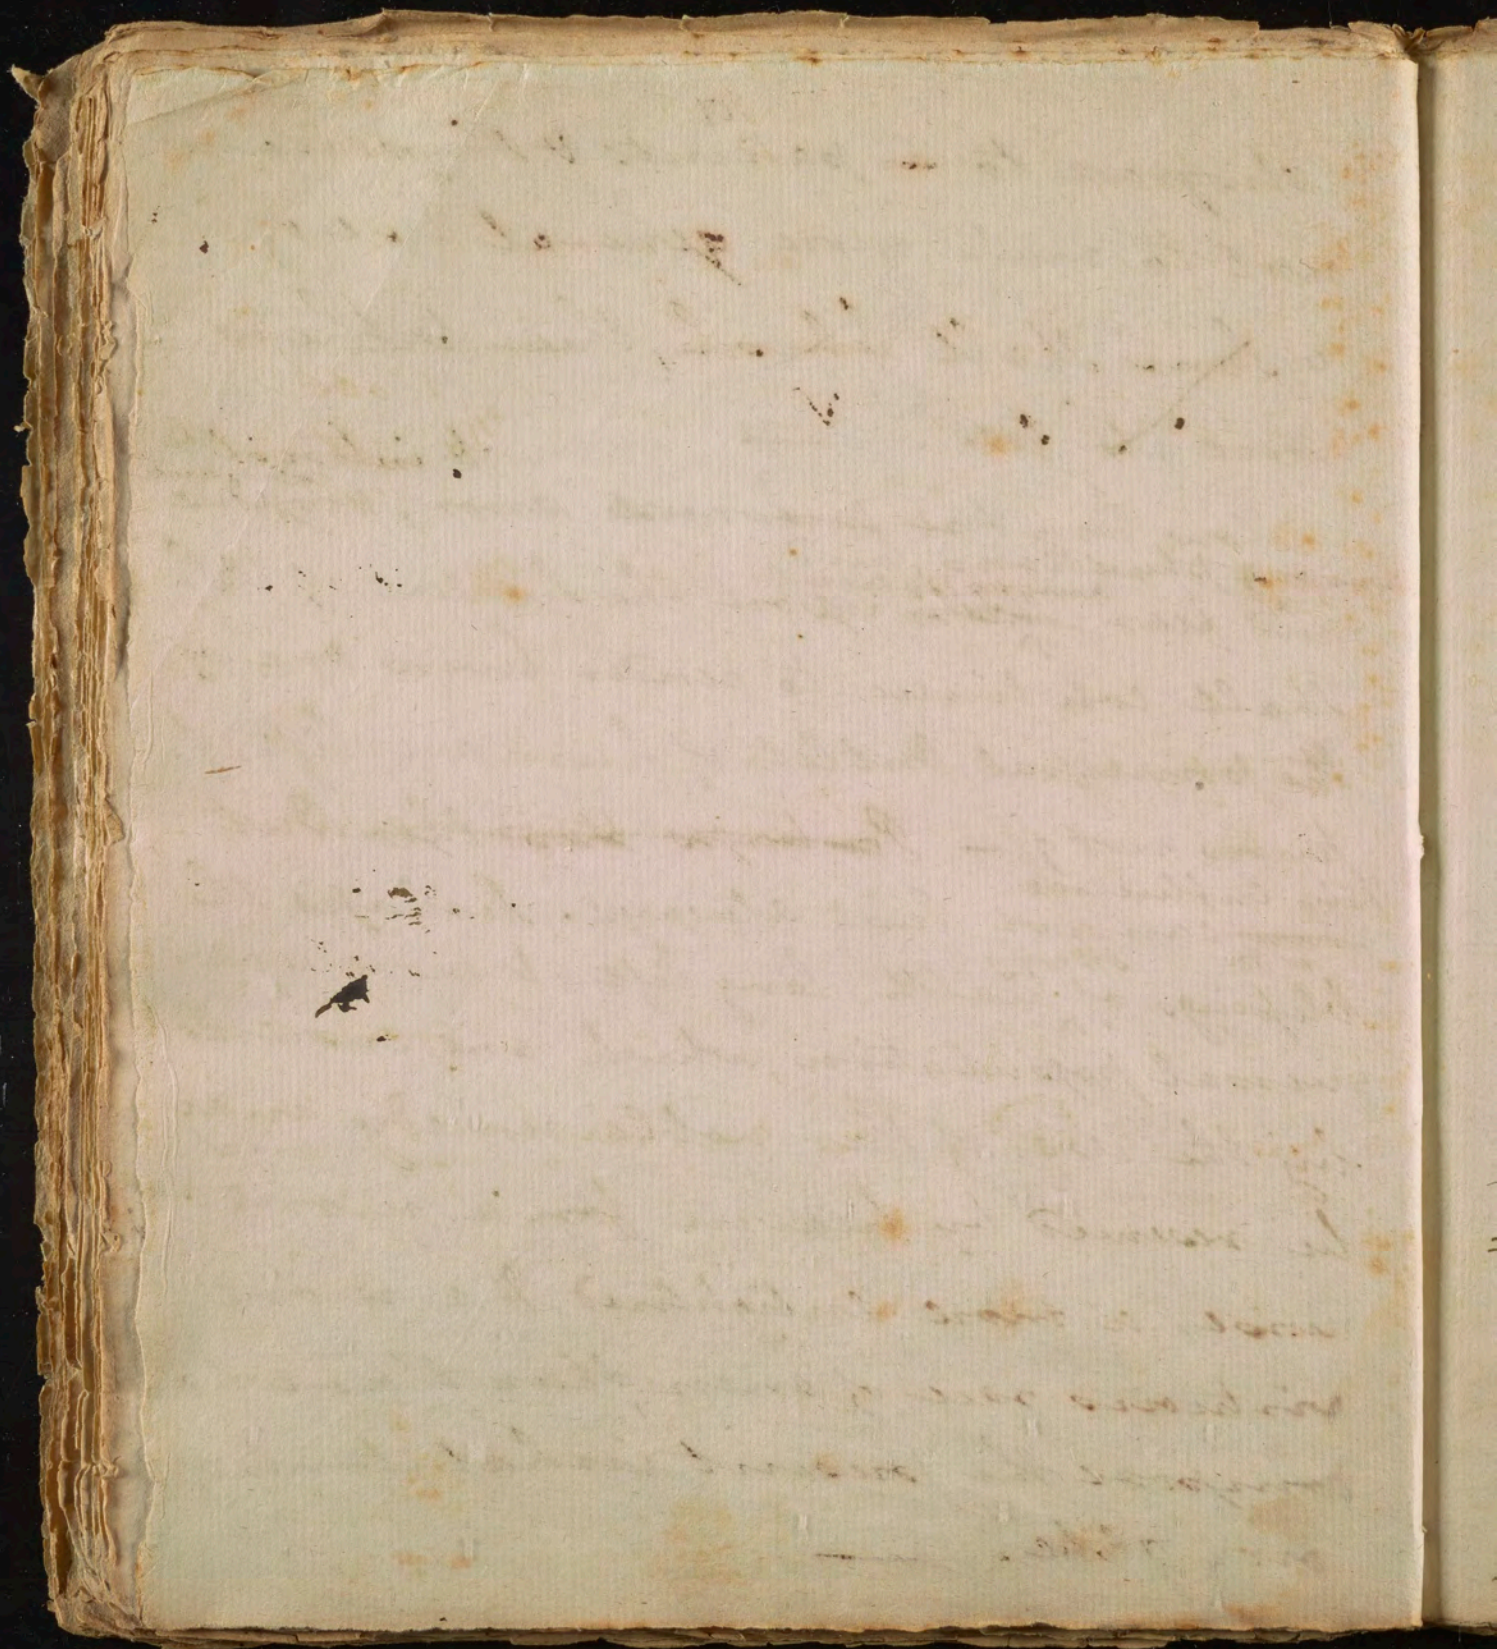

~~How long the present fears, & cross~~
 Considering the utility of this remedy,
 and how consonant it is to ^{a just} ~~the~~ theory
^{reasoning,} of ~~fever~~, I cannot help remarking
 that it is equally a misfortune, and a

see white on object: to vol: p 85. 80

disgrace to ~~a~~ patients & Physicians
not to make more general use of it.

" Sons shall blush, ~~their fathers~~
were its foes?" V

How long the ~~present~~ error, ^{& interest & ignorance} ~~among physicians and~~ ^{among patients} ~~and fear,~~ ^{shall} upon the subject of V.S.
shall continue to render fevers one of
the principal outlets of human life, I
know not; — ~~Perhaps that~~ But
^{this influence} ~~they~~ cannot last always. Perhaps the
blessings of ^{spedy} health, long life, & more uni-
versal population, which are ensured
by the use of this noble remedy, may
be resumed by heaven for a more
wise, a more enlightened, & a more
virtuous race of men, than those who
compose the present inhabitants of
our globe. —

11 I come now to the second class of stimuli which are to be abstracted in the case of inflamed fever.

They are Heat - by means of ^{1 Cool Air} ~~the~~ cold water

2 of Food - by abstinence or low diet. ^{3 Ice}

3 of sound & light - by silence & darkness.

5 of invigorating passions - by moderate fear

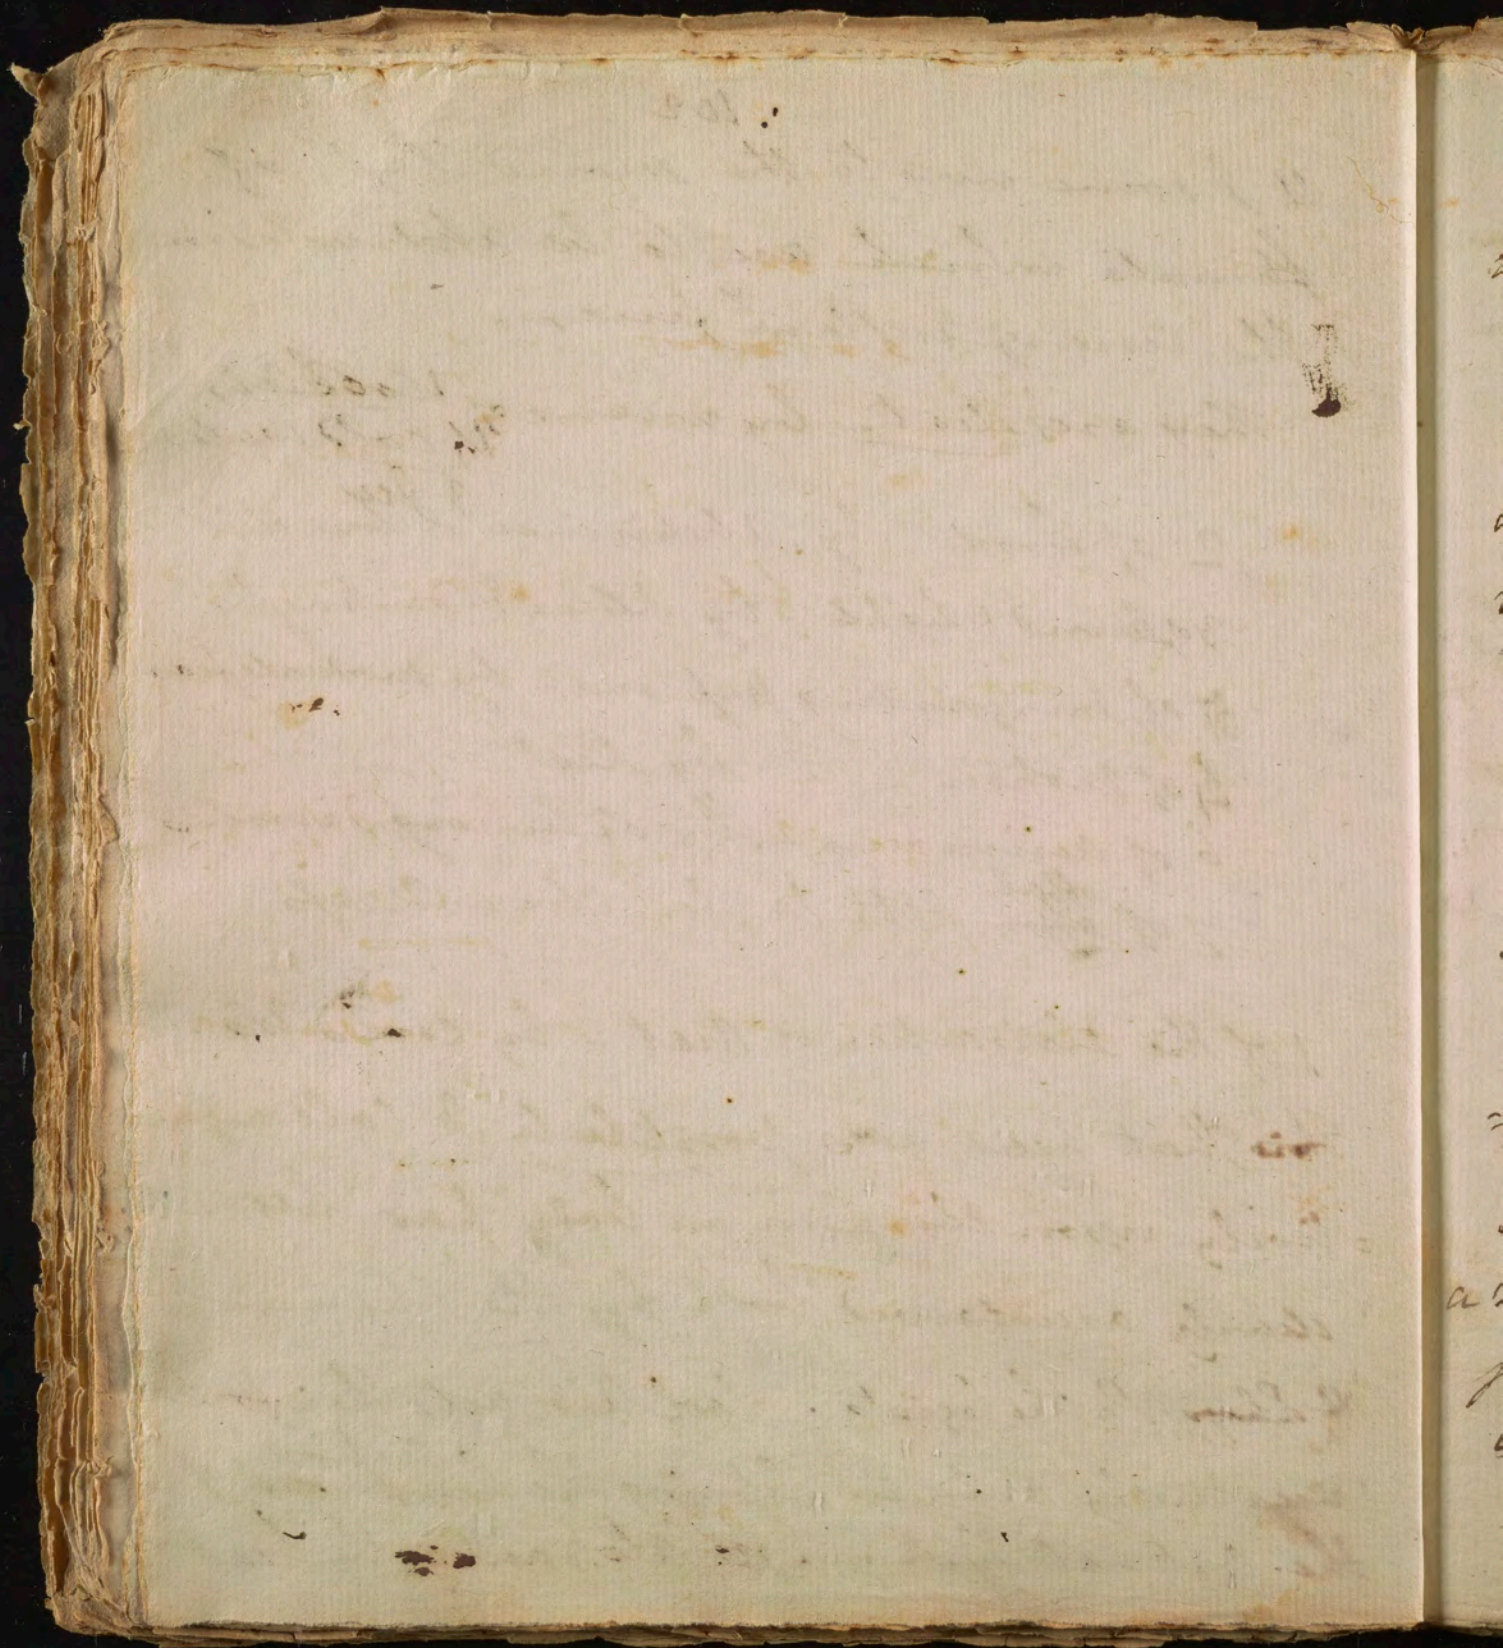

4 of motion - by Rest

6 of acrimony - by diluting drinks

7 of ~~offen~~ ^{offal} filth &c. by Chamberlains.

1 of the Abstraction of Heat - by Cool Air.

~~This~~ That heat acts positively, & Cold neg-
-tively upon the human body has been
clearly ascertained both by the Chemists
& ~~Phys~~ Pathologists. Cool Air acts therefore
negatively only in ^{action} lessening the heat of
the arterial system, & ~~is~~ abstracting the heat

of the body. The greater the violence of
 the fever, the greater the degrees of Cold
 sh^d be w^{ch} are ~~applied~~ ^{employed} to re-
 duce it. ~~The~~ ^{the} temperature of a room w^{ch}
 a person ill wth an inflamm^d fever ^{lies} should
 be much less than for a person in health.
 Supposing the 62^o to be agreeable in health,
 and the ^{feverish} heat of the body to be 120; the
 temperature of the room should be as
 much below 62 as 120 are ^{above} 96.
 That is, ~~Animal heat~~. ~~The~~ 38^o, suppo-
 sing the heat of the body in health to be
 96^o. — But 38^o in this case is only
 a natural temperature to the body in its
 state of feverish heat. — To reduce the
 action of the blood vessels, the cold should
 be in the ^{feverish} heat of 120 several degrees

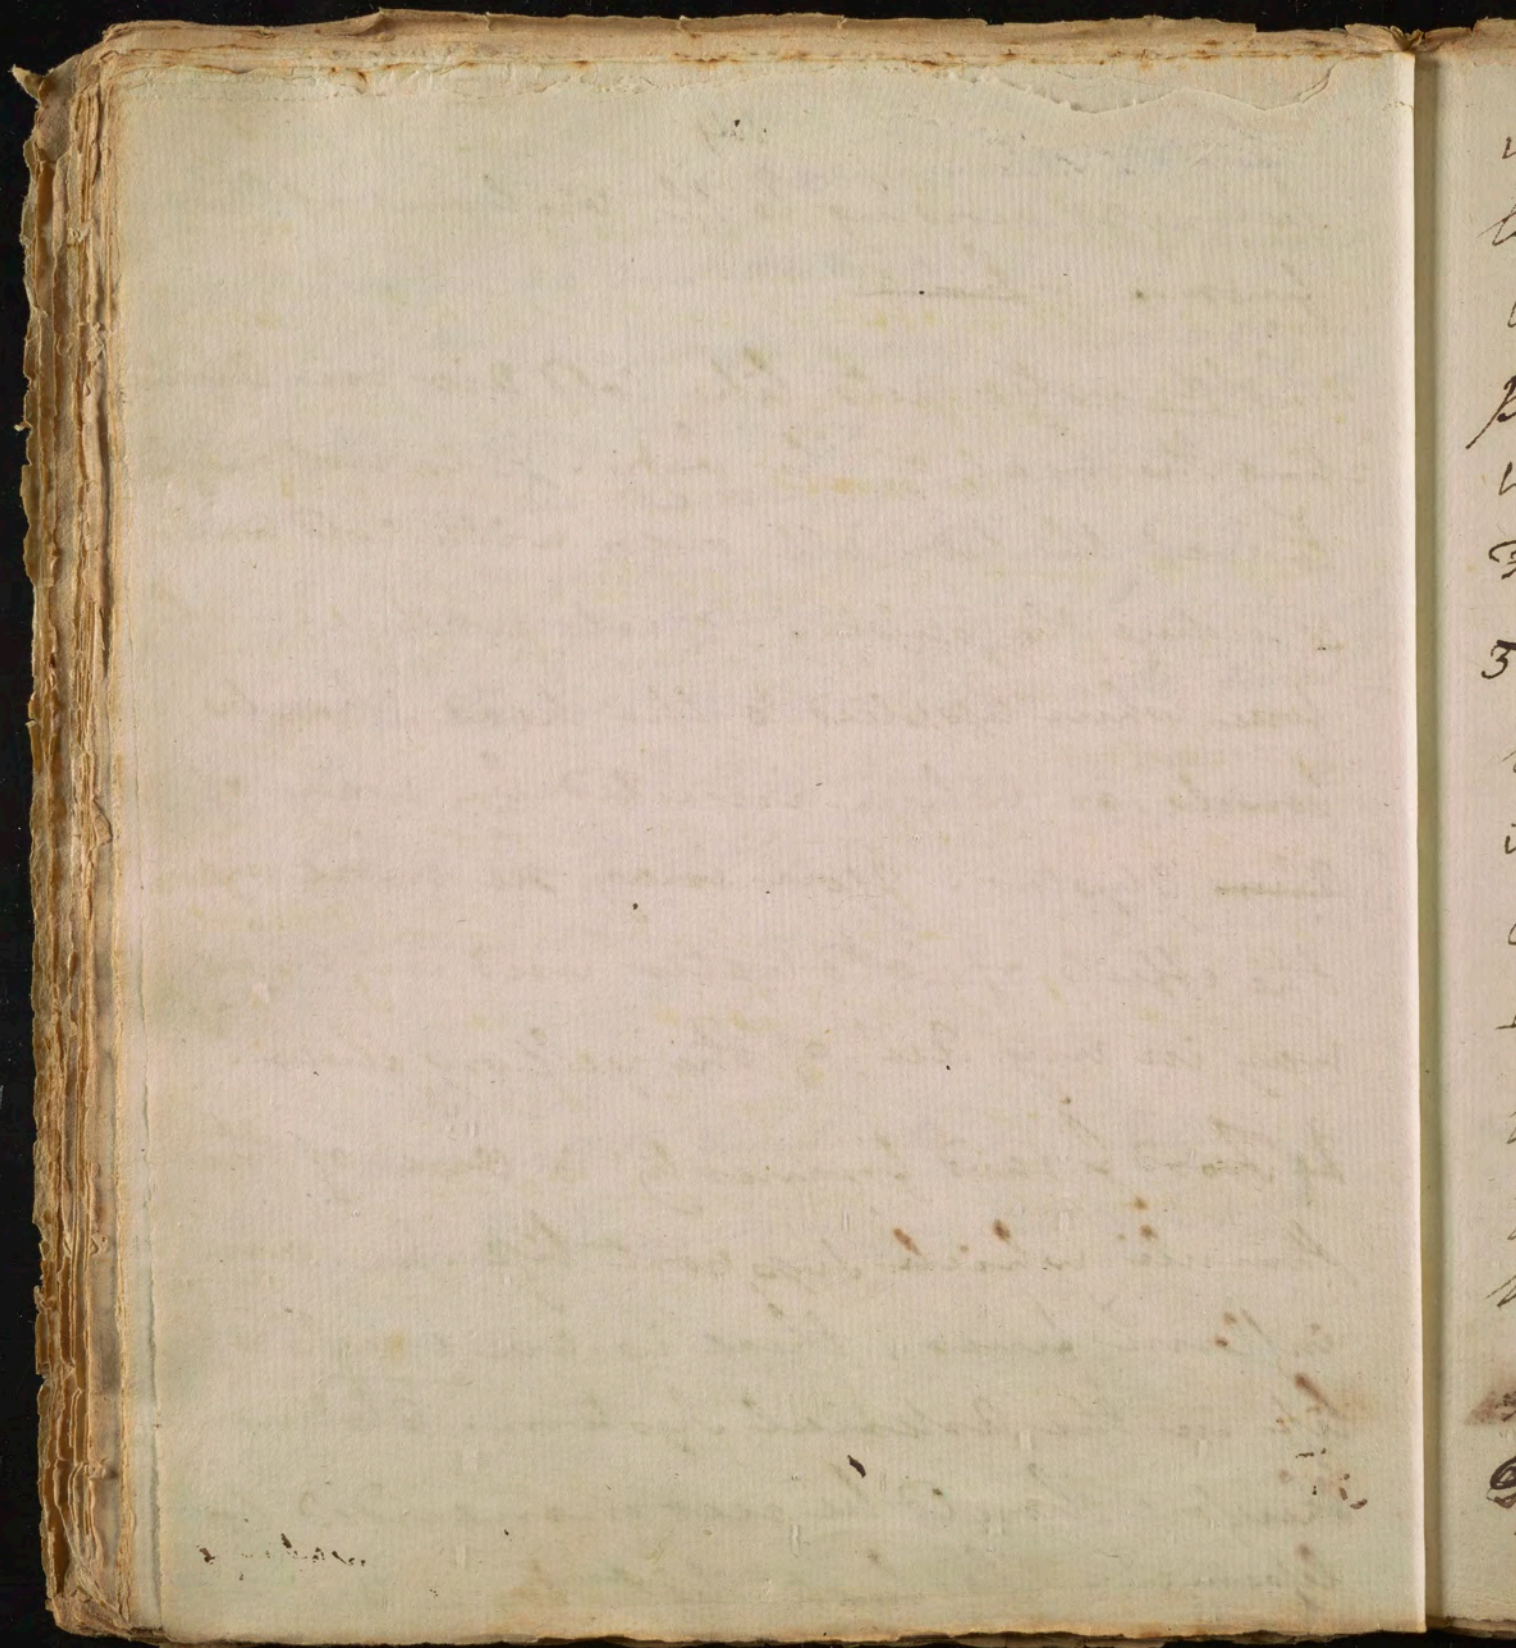

$\sqrt{3}$ Ice acts more powerfully than
Cold water as a ~~heat~~ time. I have known
it used ^{to} advantage many years ago in
the Influenza, & I have lately used ^{to}
great success in the malignant state of
fever where it has affected the head.
Best applied by a bladder. cuts; by Absorptⁿ
^{heat & 2^d by contracting vessels. by no objectⁿ}
~~The~~ The Plague - Delirium fever & cured

Dysentery by Glysters ^{the} ice added to them,
water. myself in 1794. O'Connell - Dr Kinsley &c

- + Cold Bath
~~Ice~~ used to circulate the action
& by a Dr Armstrong in the W Indies,

below 38 according to the violence of the
fever. ~~Low~~

2 Cold water acts like cold air in abstract-
ing the heat of the body. It is not necessary
to wet the body all over with cold water
to reduce the pulse. It acts with equal
force when applied to the head, limbs,
bowels, or when injected by way of
~~the~~ Glyster. You may see more upon
the effects of Cold water used in this
way in my Acc^t of the yellow fever. ^V

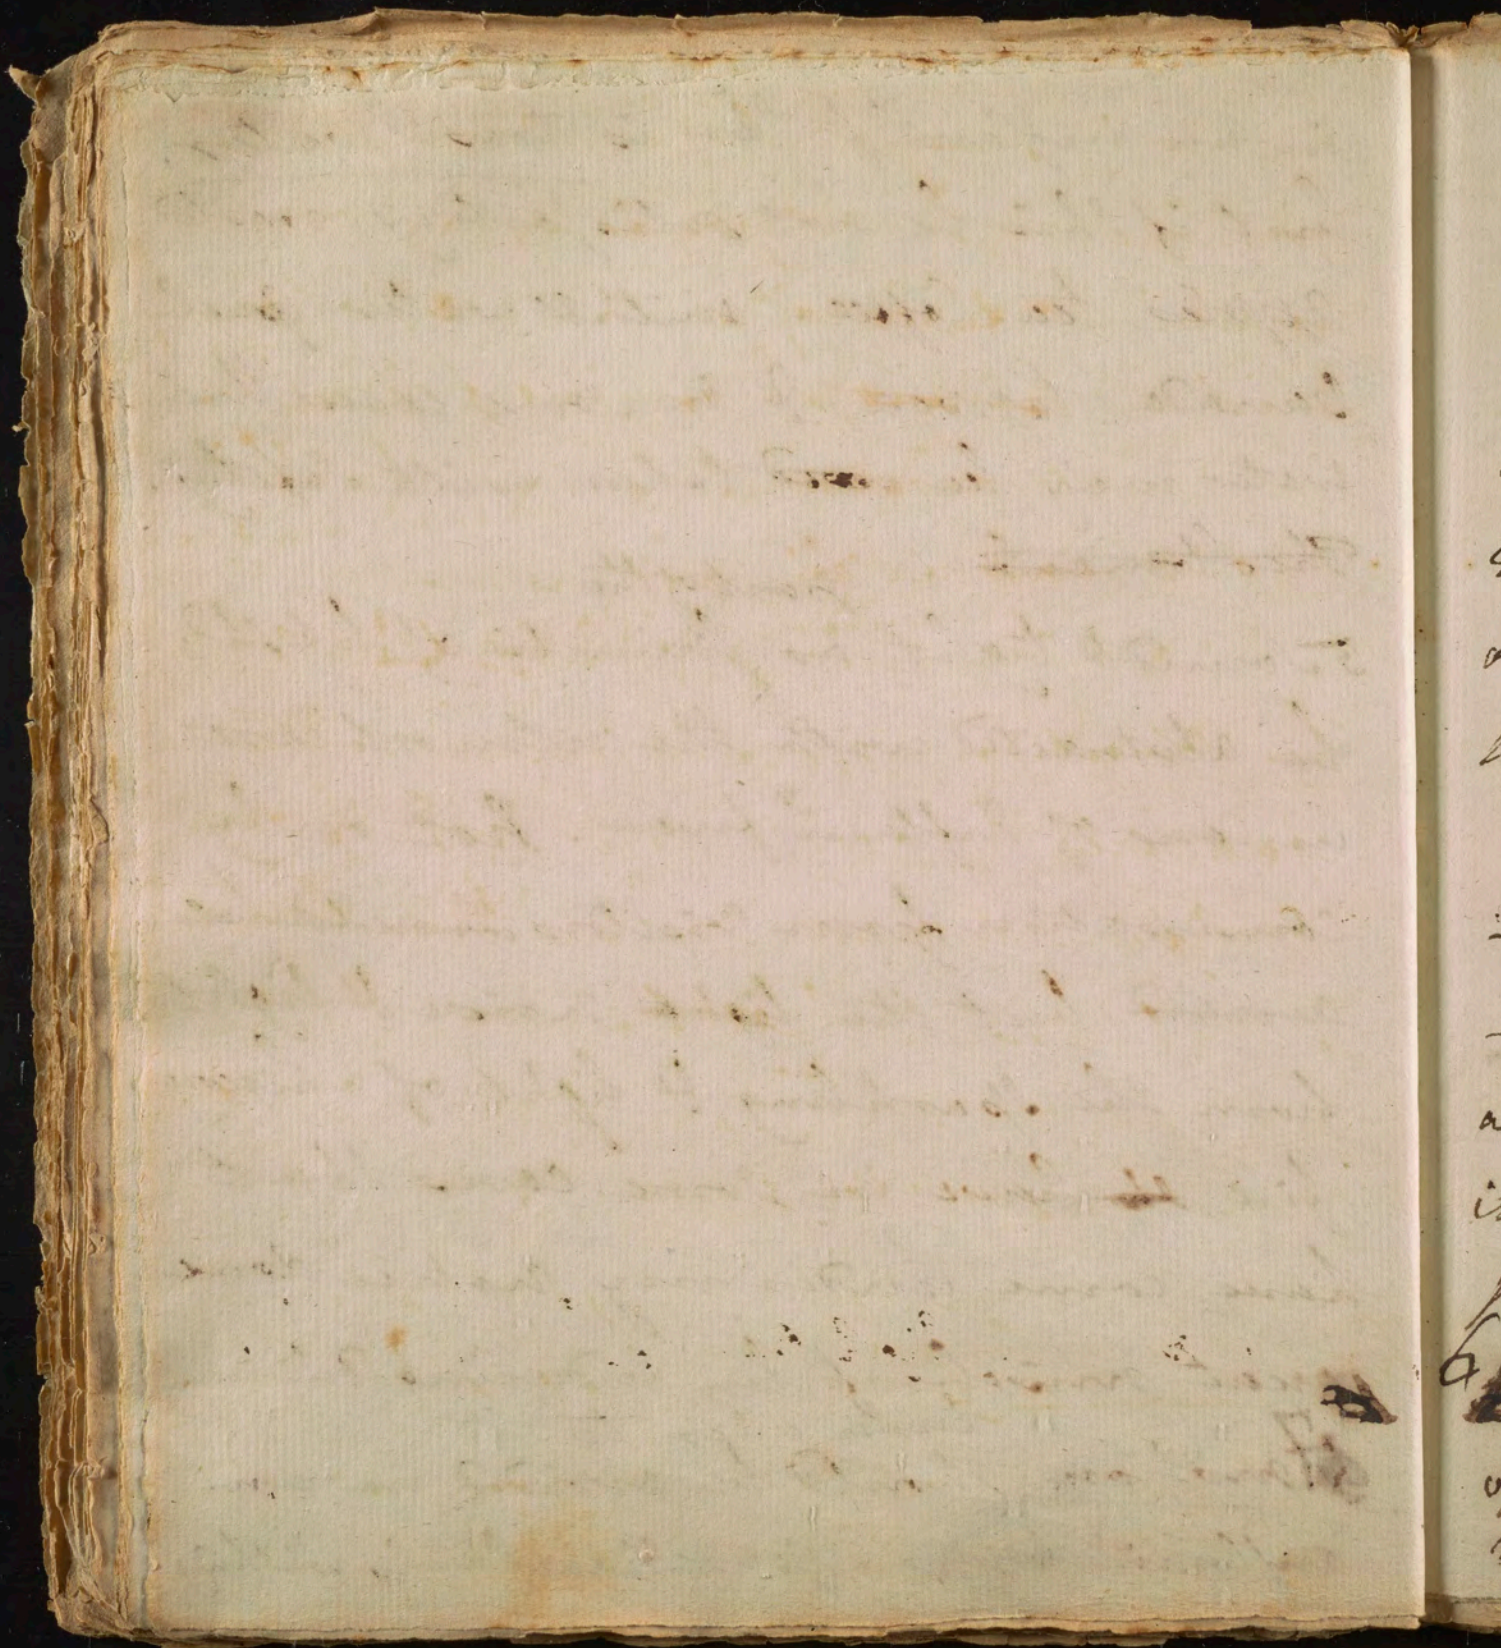

4 Food I said formerly is one of the
stimuli which support life. In an
inflamed fever, there is an excess of
life in the Arterial System. Abstinence
therefore should be recommended to
lessen it. The best diet for a patient

in an inflamed ¹⁰⁵ ~~fever~~ is trout water,
but if this be not satisfactory, roasted
apples, tea - Coffee - milk & water - Gruel
panada, tapioca, & in some cases (when
water may be ~~void~~ taken with safety.

~~The stomach~~

^{part of the}
Sound & light as stimuli of life sh?
be abstracted with the utmost care
in case of inflamed fever. Not only
conversation from visitors should be
~~avoided~~, but the ~~light~~ noise & light
from the sparkling & light of a chimney
fire ~~sh~~ have in some cases that
have come under my notice done
great mischief by inducing Delirium.
^{turn over to}
~~Motion~~ should be avoided in an
inflamed fever, particularly walking,

riding &c. but I have seldom known
 persons pursue a journey with an
 incipient fever of too much action,
 without ~~paying~~ suffering from it.
 Frequently a moderate fever is by this
 means made fatal. Sitting up in bed,
 or in an arm chair is not liable to
 this objection to motion. It seems to
 equalize the excitement of γ system.
 - It lessens determination to the brain,
 - It delivers the body from the warmth
 accumulated by lying in bed, & lastly
 it admits fresh & cool air to every
 part of the system. Dr Sydenham com-
 mends it in high terms. 12:107. - N^o 8
 A moderate fever is the abstraction
 of the invigorating passions & and when
 moderate & our persuaded is useful

✓ Influenza suddenly cured by
a fright, & Dr Rutherford once

in the inflamed state of fever. I have
 known the inflamed symptoms of V
 & There is a tendency to acrimony
 in the blood, & there is an actual
 generation of it in the Bile, ~~feces~~ &
 Urine in all fevers. Diluting liquors
 are therefore highly proper in all
 fevers of too much action. I have
 mentioned a fact in favor of their
 utility in ~~many~~ ^{uncommon} the history of the
 yellow fever. Too much cannot be
 said in their favor. The best stimula-
 ting the drinks are the latter.

There is none better than toast &
 water, but if others are desired,
 Tamarind water, Apple water, with
 & water-limonade, Barley & Rice

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

water may be taken as freely as the least & water. — The measure of the use of these drinks should not be the thirst of our patients. We should be enticed to drink even when he has no thirst, for the absence of thirst is frequently connected with a morbid state of the nervous system, at a time when the presence of Anisimony under dilution highly proper.

¶ Filth from a dirty skin, & from the excretions of the body when retained in a sick room all act as stimuli upon the arterial system. ~~They~~ ^{The} former should ^{often} be washed away with soap & water, & the latter shd be removed from a sick room, as soon as they

VIII ~~Med~~^{Med} which ~~is~~ ^{is} direct
See — see Vol. in p: 184

are discharged. The filth which accumulates around the teeth & upon the tongue, should often be ~~was~~ washed away, for it acts by its ~~acrimony~~ ^{acrimony} upon the sensibility of the nervous system. ✓

~~Under this head of~~ It is not my business to inquire in what manner certain medicines act as sedatives. I understand by them all such substances as when taken into the stomach, or applied to the body lessen the force & frequency of the pulse. They are ^{vegetable acids} Nitre, & other ^{min. acids} neutral salts, Sugar of lead. Rosemary & Sweet Oil. —

Nitre is to be pref? to all the neutral salts, except ~~when the~~ ^{the} in bilious states of ^{the} ~~the~~ in which case it is offensive ^{me,}

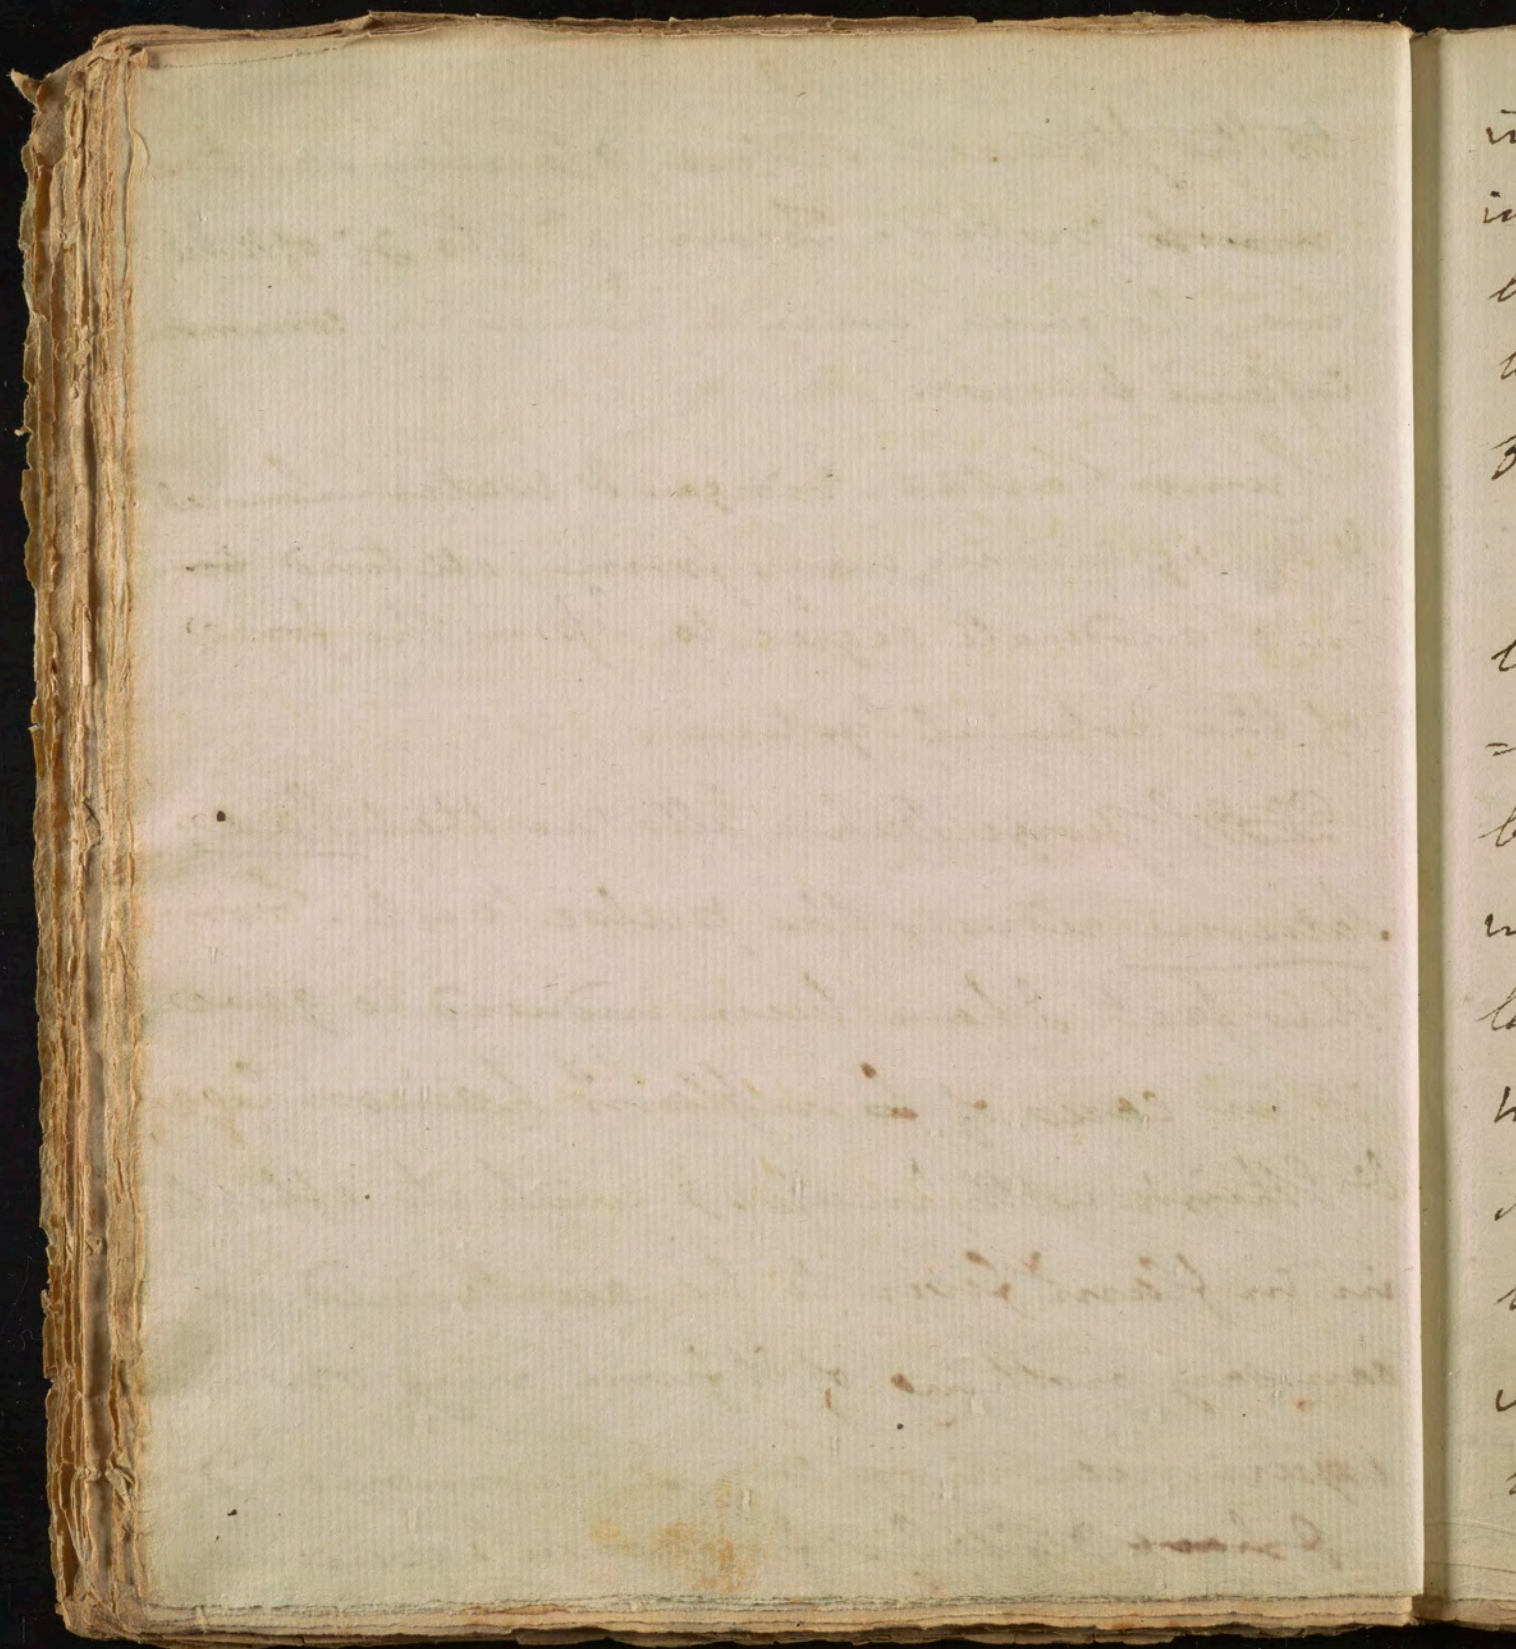

[Faint, illegible handwriting in a cursive script, likely from the 18th or 19th century. The text is written on aged, yellowed paper with visible foxing and staining. The script is dense and fills most of the page.]

[Partial view of the adjacent page on the right, showing the right edge of the paper and the beginning of handwritten text in the same cursive script.]

to the stomach. Here Glauber salt is
~~most~~ proper. From 9th to 2i of the
 may be given every 2 hours in common
 inflam^d fevers. -

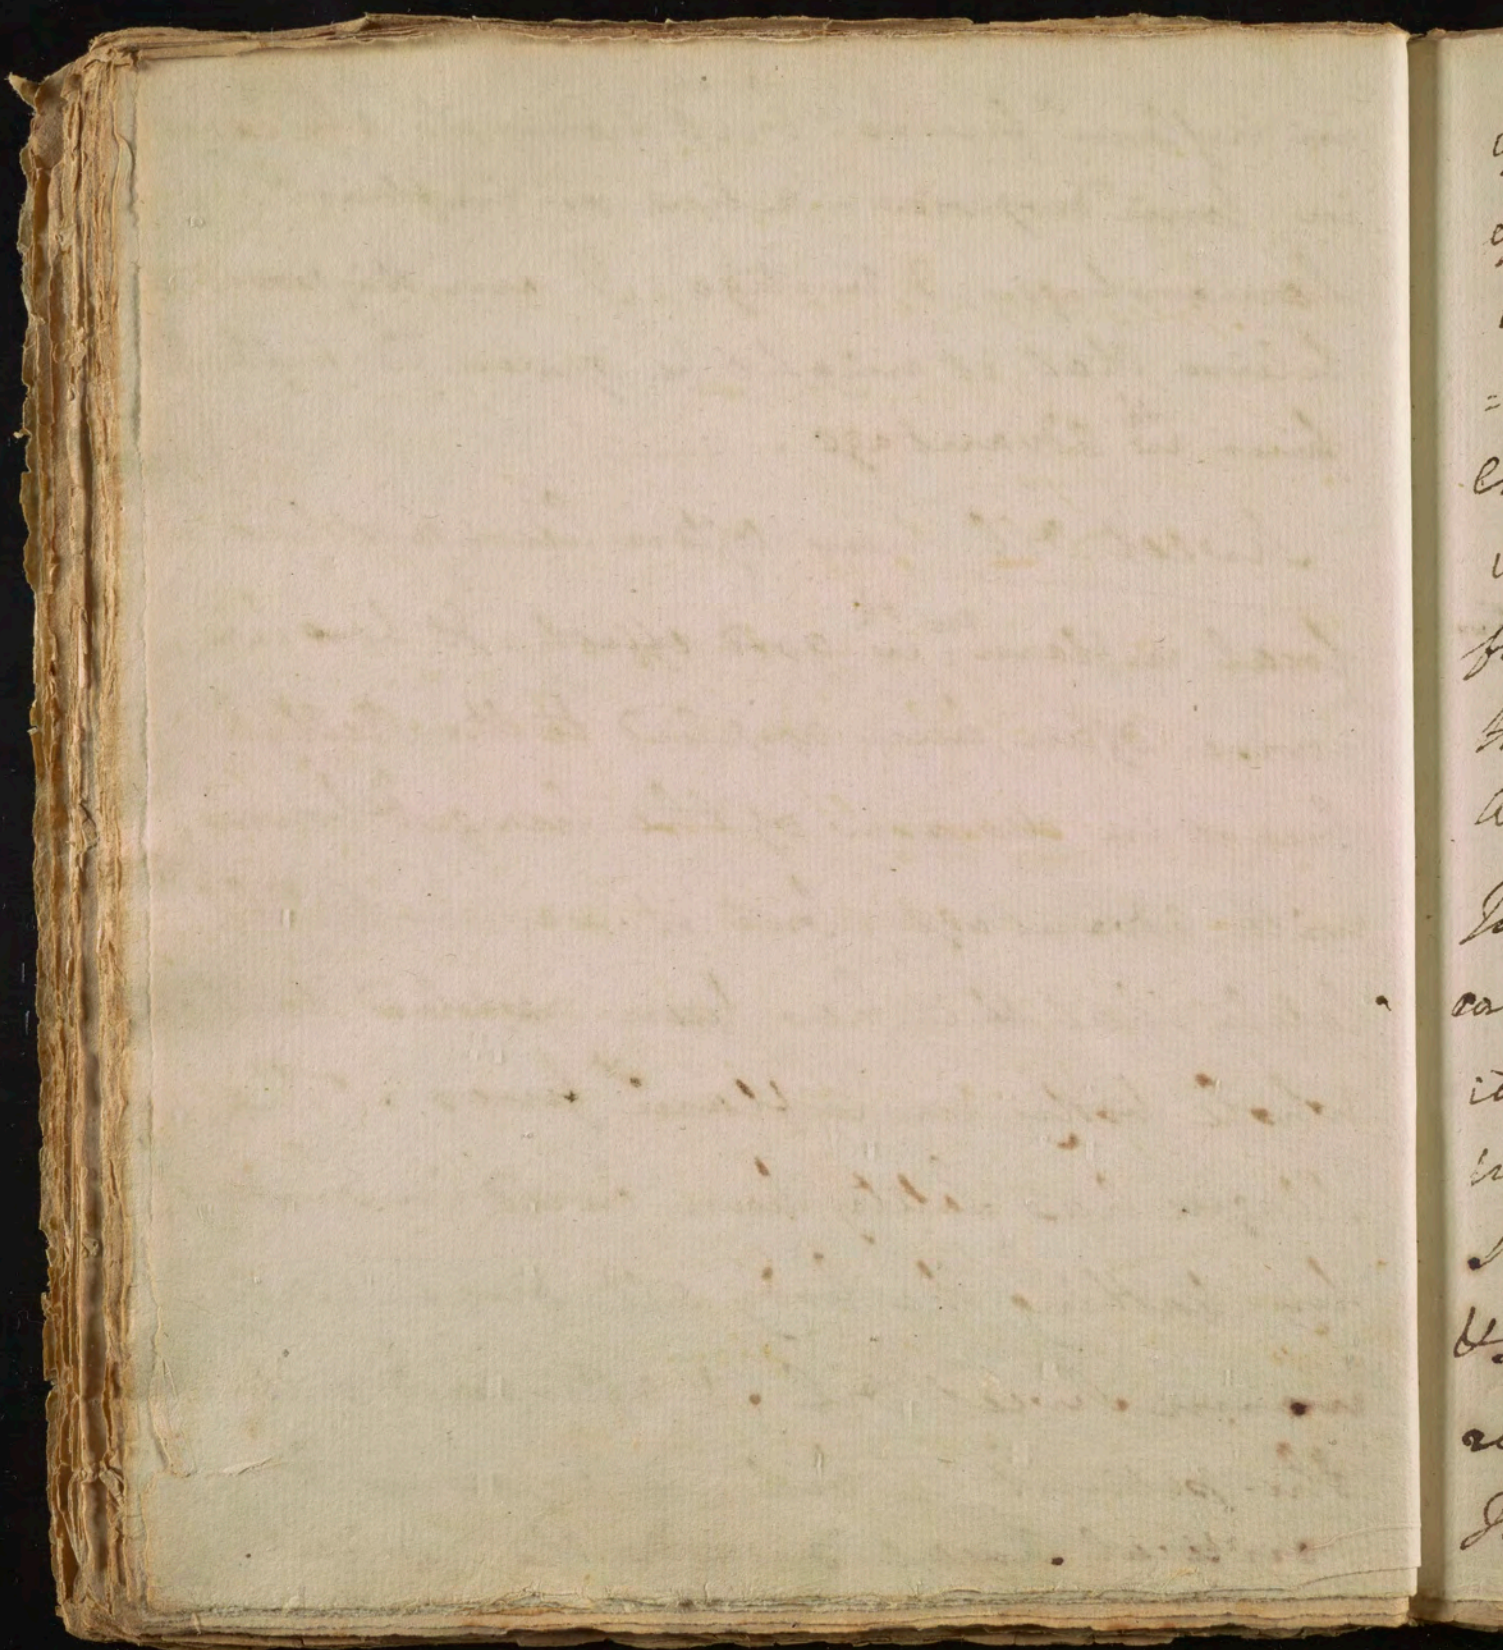

Juvenor Tartar - vinegar & water - Lemonade
 & the veg. acid in every form, all tend to
 in a moderate degree to loosen the force
 of the Arterial system.

~~Dr~~ George Baker tells us that Sac.
Saturni reduces the pulse to 42. From
 this fact, I have been induced to give
 it in cases of h inflam^d hemorrhage,
 & I think with success. I wish its effects
 in inflam^d fever to be sustained. I
 can say nothing of it from my own
 experience. nor can I recommend
 I ~~have~~ Digitalis from own experience,

116
in inflam^y fevers, but from its efficacy
in tonic dropsies - active or inflam^y.
hemorrhages, & vertigo, I am disposed to
believe that it might be given wth inflam^y
fever th advantage. —

Sweet oil has often been applied to
local inflam^{es} wth good effect. It has like-
-wise often been applied to the Belly &
breast in diseases of the lungs & bowels,
with advantage, but it was not till
lately that it has been applied to the
whole body in inflam^y fevers. The
Plague has lately been cured in Turkey,
by bathing the body all over with
warm Sweet oil, & afterwards putting
the patient to bed. A copious &
critical sweat succeeds the application

of this remedy. — Considering the effects of oil in composing waves of water, & its speedy operation in curing commotions in the bowels, ~~or~~ whether from colic or Dysentery, it seems strange ^{that} we should ~~be~~ have been so long in finding out its usefulness when applied to the surface of the body, in inspiring arterial action. ~~Perhaps the~~ ^{the} precept of St. James "to anoint the body ^{the} with Oil in cases of dangerous illnesses, ~~may be~~ ^{favours the} idea of its being useful when used in this way. There is a medicine called the Samaritan's Balsam composed of Wine & Sweet oil which gives immediate relief when applied to a fresh wound. It probably acts by inspiring action in the

V in speaking of its virtues in abating
violent & irregular actions.

irritated or inflamed vessel. The same
 mixture is recommended by ~~and~~ a Russian
^{from long experience of its efficacy,}
 Officer, to the late King of Russia as a cure
 for the Colic. It probably acts as a
 Sedative, upon the agitated, or irregularly
 moving fibres of the bowels. — The good
 effects of ~~sweet~~ oil in the Cough which
 attends pleurisy should not be passed over
 in this place, ^{in this case} It acts by composing the
 agitated ~~the~~ branchial vessels thro' the
 medium of the Oesophagus in its passage
 into the Stomach. Ego to 21st gunt Ind.

We proceed now to make a few
 remarks upon ^{the} inflamed state of fever as
 it appears in all the ^{common} febrile diseases to
 I can only glance at them to connect my system
~~with the body~~ of fever. 1 of the Plague.

It is the most inflamed: ~~all~~ of all states
 of fever — the stimulus of ~~so~~ which
 produces it being so great as sometimes

[Faint, mostly illegible handwritten text in a cursive script, likely from the 18th or 19th century. The text is written on aged, yellowed paper with some visible staining and wear along the edges.]

114
instantly to extinguish life, but more
frequently to prostrate all the powers
of the system, also frequently to destroy
the organization of the viscera, & to pro-
-duce ruptures of the vessels which ter-
-minate on the skin, & in the lymphatic
glands - hence the frequency of petechiae,
abscesses, Bubo's carbuncles &c in this
disorder.

The cure of this fever has been at-
tempted by sweating. But its ~~most~~
natural remedy is U.S. - ~~to be~~ certainly
consists in evacuations. From the facts
related by Dr Sydenham, ~~I am satisfied~~
that U.S. used as it was practised
by the Soldier at Dunster in Dorset-
-shire, or as advised by Riverius
would cure the Plague with as much

[Faint, illegible handwritten text in a cursive script, likely from an 18th-century manuscript. The text is written in brown ink on aged, yellowed paper.]

[Faint, illegible handwritten text visible on the right edge of the page, continuing from the adjacent page.]

Certainty as it does the yellow fever.
 see Savage - Note Book Vol: 3 p 177
~~I refer you for~~

2 The yellow fever is the 2nd grade of
 inflamm^y fever. I refer you for a history
 of it to my printed an^r of it as it appeared
 last year. The experience I have had
 this year
 of the efficacy of all the remedies, I have
 recommended, enables me to decide
 more ~~positely~~ positively than ever in
 their favor. Out of nearly 130 patients
 whom I have attended since the 9th of
 June, I have lost only two, or three
 at most. ~~My greatest~~ ^{two of} these were
 persons in whom my prescriptions
 were disobeyed. My greater success this
 year than last, was owing to my
 using bleeding & purging more plentifully

✓ One ~~of~~ half of these ~~cases~~ ^{blood} patients
lost from 50 to 80 ^{bleeds} ~~times~~, before their
fevers ~~were~~ ^{were} subdued. Not thus
successful was the practice of those
Physicians who ~~used~~ ^{prescribed} Bark & Wine, or
who used ~~moderate~~ what they wisely &
gravely, call "moderate Bleeding". ~~One~~
One of our Physicians has ~~confessed~~ ^{confessed} that
of ~~23 patients attend~~ ^{23 patients attend} ~~out of~~
out of 23 patients whom he attended in
the yellow fever, ^{this year} he has lost 17. His
remedies were Bark - Wine & 3 or 4
bleedings. I was not singular in my
success. Dr Griffiths, Dr Physic & Dr Sweetser,
who ~~adopted~~ ^{used} the depleting mode of practice
in the same extent that I did, were equally
successful in ~~all the cases~~ ^{the} as myself. When
diseases are incurable Physicians are always
misled by false, or only half right theories..

than last year. ¹¹⁶ The symptoms which
constitute this grade of fever, are "red
eyes - great pain in the head - sickness
or vomiting - sighing - & a disposition
to faint; ^{scarlet red blood,} & black Discharges from
the bowels" - ~~and~~ most of the symp-
toms I have enumerated occur in
other inflamm^y fevers besides the yellow
fever, but I never saw black stools
in any other fever, than a yellow fever
in my life. - All the patients ~~whom~~
~~I attended in this fever had all~~
~~the~~ cases I have considered as of the
yellow fever, had all the above symp-
toms, & ~~was~~ many of them were yellow.
- Mr Cooper & - ~~so~~ fevers in ~~the~~
hospital were both yellow fevers. It
is true they had pleuratic symptoms

V I have purged more copiously this
year than last. - 150 qts of Calomel &c
to Wadge - 200 to Mrs Linox Dr Layscamp
purged till chicken water came out as it
went into the bowels - he called himself
a tripe cleaner.

joined with their ¹¹⁷ bilious, but this is very
common in the yellow fever after cold
weather. One of them was bled 6—
the other 7 times. Now who ever
knew pleurisy so acute as to require
such copious bl. in the month of
November? —² —^v

I ~~am now~~ have ~~collected a number~~ preserved a
history of this yellow fever as it has
lately appeared in our city which I hope
to publish next spring. It will throw
light upon fevers in general, & will
I hope add fresh support to the doctrines
& practice I have published of the Epidemic
of last year. —

of the small pox

This disorder is related to the yellow
fever in many ~~particulars~~ ~~but~~ its
violence ~~is the~~ when taken in the

natural way. all the malignant symptoms which appear in it as hemorrhages, scarlet cold blood & petechie are the effects of violent inflammation. you see here gent: how mechanically stimuli act on the arterial system. The effects are nearly the same whether the stimulus be the contagion of $\frac{1}{2}$ yellow fever, the small pox, or a pain and inflammation in the eye as in the case I mentioned formerly communicated to me by Dr. Physic.

The small pox furnishes an obvious illustration of the grades of bilious fever for w^{ch} I have contended. From the same contagion of the small pox, we often see the distinct & the confluent small, both distinguished by different

The male of the species of *Phrynosoma* in this
 illustration of the species of *Phrynosoma*
 is a male. I have constructed. I have
 some description of the male of the
 species in the species of *Phrynosoma*
 in the species of *Phrynosoma*.

names, as the pslethical - the crystalline,
 the warty, & the anomalous - & the
 mild & distinct small pox. Habit,
 & Season produce this variety of grades
 or ~~degrees~~ of force in the lymphatics in
 this disorder, & yet who has supposed
 all these different degrees of small pox
 to depend upon different specific contagions?

- That Understanding must be uncommonly
 dull & contracted, which ~~does~~ not perceive
 that the ^{critical} interm: - remitting - & yellow fever
 all depend upon one Source (either ~~remote~~
 miasmata, or contagion generated
 from it) and that all the variety we ^{observe} see
 in that fever depends upon greater or
 less predisposition - greater or less force in
 the remote & exciting causes, & more

ignorant of this fact. The ^{further} speaks of
malign^t intermittents which end in death
in the 3. 5 or 7th paroxysm. Dr Cleghorn
& Riverius describe Intermittents of the
same kind. Topliff's case —

+puratory ~~fever~~ as well as in the
eruptive fever of the smallpox more
especially where it is attended with
pneumonic symptoms. The practice
is recommended by Dr Keen. — I have
seen it used. It is used without effect
owing I believe to its not being sufficiently
copious. —

or less of an inflam^d Constitution in
 the Air. Hence we ^{so often} observe yellow fever
 to produce ^{common} ~~rapid~~ interm^{ittent}, & a common
 Intermittent to produce most malignant
 yellow fever. — Hippocrates was not^v

The Cure of the small pox when taken
 malignant, or highly inflam^d: should be
 attempted. 1 By copious vs: — Dr. Rush
 used it with success in some cases, but
 failed in others, owing probably to his
 not ~~using~~ drawing a sufficient quan-
 tity of blood. vs: It⁺ be used in the sup⁺

2 Evacuations from the Stomach &
 bowels. I learned from Dr. Hillary my
 master Dr. Redman who picked up the
 practice from Dr. Hillary to give a strong
 dose of purgative & purging Physic

The above is the first of the series of letters which I have written to you. I have written them in the hope that they may be of some use to you. I have written them in the hope that they may be of some use to you. I have written them in the hope that they may be of some use to you.

121

in the eruptive fever of the small pox. My
medicine here is Two grains of Tart Emet.
& $\frac{1}{2}$ of Calomel. I have seen
it work 24 hours, and I have observed
the good effects of it with great
pleasure. It generally excites a profuse
perspiration. In cases which would
have probably been fatal, I have seen
the pox distinct & a most favorable
issue to the disease.

3 Salivation. My venerable master,
used $\frac{1}{2}$ in the small pox in such quan-
tities as to excite a salivation. This design
was to attenuate ^{the} phlegm which often
suffocated the patient during the turn
of the pox. It the $\frac{1}{2}$ did good in this
way, but I suspect its chief utility
depended on its depleting, & saving vital

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

parts by creating an artificial weak
part. -

4 Gentle purges should be used every
day during the suppuratory fever pro-
vided the pulse is full & tense. -

Malignant Sore Throat.

Be not surprised Gent. that I place
this fever (which has been considered
as putrid) time immemorial, among
inflammatory fevers. The stimulus which in-
duces it is more rapid in its operation
than in any other of the Common cases
of fever. It may be compared to a
soap Bubble which soon ^{bursts &} destroys
itself. The gangrenous state of this
fever generally comes on on the
3^d but sometimes on the 2^d and 4th

24
The first of the month of June
was a day of great beauty and
the sun shined brightly upon
the water. The wind was
from the north and the
water was calm. The
boats were out in the
bay and the people were
enjoying the day. The
boats were of various
sizes and colors. The
people were of various
ages and colors. The
day was a day of
great joy and
celebration. The
people were
enjoying the day
to the full. The
boats were out in
the bay and the
people were
enjoying the day.
The boats were of

even on the first day. all its first
 symptoms indicate too much action
 in the system. The ^{best} ~~most~~ remedy for it
 is a ~~small~~ ~~large~~ vomit or purge
 given on the first day of the disorder.
 This sore throat was very fatal in
 this city in the ^{winter} ~~year~~ of 1762. my
 late master for a while lost several
 patients with it, But ~~as soon as~~ ^{after} he
 began the cure of it by a vomit of
 Trappath Mineral, he did not lose
 a single patient. — The success of this
 remedy proved that the disease was
 inflam^d: — A salivation in it has
 been found useful. It probably acts
 by depleting, & by correcting the action
 of the vessels in the throat, on which

[Faint, mostly illegible handwritten text in cursive script, spanning approximately 15 lines across the page. The ink is dark brown on aged, yellowish paper. Some words are more legible than others, but the overall text is too faded to transcribe accurately.]

124

part the Contagion seems to act
with specific force. —

Is V.S. proper in this fever? I
suspect many patients have been
lost from the want of it. I well
recollect hearing my master lament
the loss of an English servant who had
just arrived in this country from
the want of V.S. - His symptoms he
said were at first inflamm^y, but the
family to which he belonged objected
to his being bled, because Boole had
condemned it in a putrid sore throat.

Inflamm^y fevers from cold, whether
they appear with symptoms of Pleurisy
Rheumatism, Angina & pulmonary
Consumption, all require V.S. to cure

[The page contains faint, illegible handwriting, likely bleed-through from the reverse side.]

them, but as they are fivers of
 much less action than the Plague
 yellow fever & Small pox, they required
 much less to subdue them, or less
~~blood~~ in a given time. When I first
 studied & first practised Physic in this
 city these fevers were more frequent
 than they have been for several years
 past. — From ~~the~~ the operation of va-
 rious Circumstances, they are gradually
 disappearing, & our fivers even in
 winter are assuming a more bilious
 complexion, which in common years
 bear less of: ~~is~~ than our old ~~fe~~ in flamm.
 fevers. The same ^{remark} ~~observation~~ has been
 made by to me by Dr. Linton, and
 Dr. Hayforn —. Nature takes notice

✓ The ~~debility~~ weakness which occurs
in this disorder is supposed to forbid it,
But why so — ? ~~we can~~ Certainly we
all allow is the effect of a weakness in
the bowels. It is a plethora from an
accumulation of ~~feces~~ feces. We do
not attempt to cure the weakness of
the bowels till we have discharged the
feces from them. Why then attempt
to strengthen the Arterial system till we
have first removed the plethora from
it by Vs. —

of it in his travels thro' America.

The consumption is Almost the only form in which these ~~old~~ ~~and~~ old-fashioned disorders show themselves. It is

a feeble or chronic state of pleurisy.

It requires however ^{vs. this less copious} ~~as copious~~ ~~the~~ less frequent than in pleurisy to cure it. ^{the gentle} Rheumatism has likewise changed

its form, and now most frequently appears in ~~a~~ a chronic state, with still accompanied with so much ~~to~~

febrile action as to require vs. The pulse here is ~~in~~ Synocha. It have

called this ^{state of} ~~intermediate~~ Rheumatism Rheumaticula. Bring in part of Pneum.

For ~~a~~ ^{an} inflam^d fever with symptoms of ~~big~~ great pain &c in the breast vs.

should be used until the pulse be
 reduced. ~~the~~ I rely upon the lancet
 chiefly to cure this state of fever, ~~the~~
 hence I cure it for the most part
 without ~~leaving~~ a cough. ^{Dr Denham} ~~in this~~
 cured it in the same way, hence
 his words are - "I choose to draw the
^{redundant} humors thro' An orifice in the Anus
 rather than thro' the lungs." There
 are 4 women now living ^{in good health} in this city,
^{each of} whom I bled for pleuratic fever
 above 12 times - one of them 14 times
 before, & during the late war. - I have
 so certain ~~as~~ is the remedy of Ves: in this
 fever, that I have seldom lost a patient
 in it, and ~~as~~ where I have, Ves: has been
^{too late or} used too sparingly. —
 With the other remedies for Inflam^y:

v Rhynchonella what?

128
 fever ~~may~~ shd be used according to
 symptoms in this state of fever. —

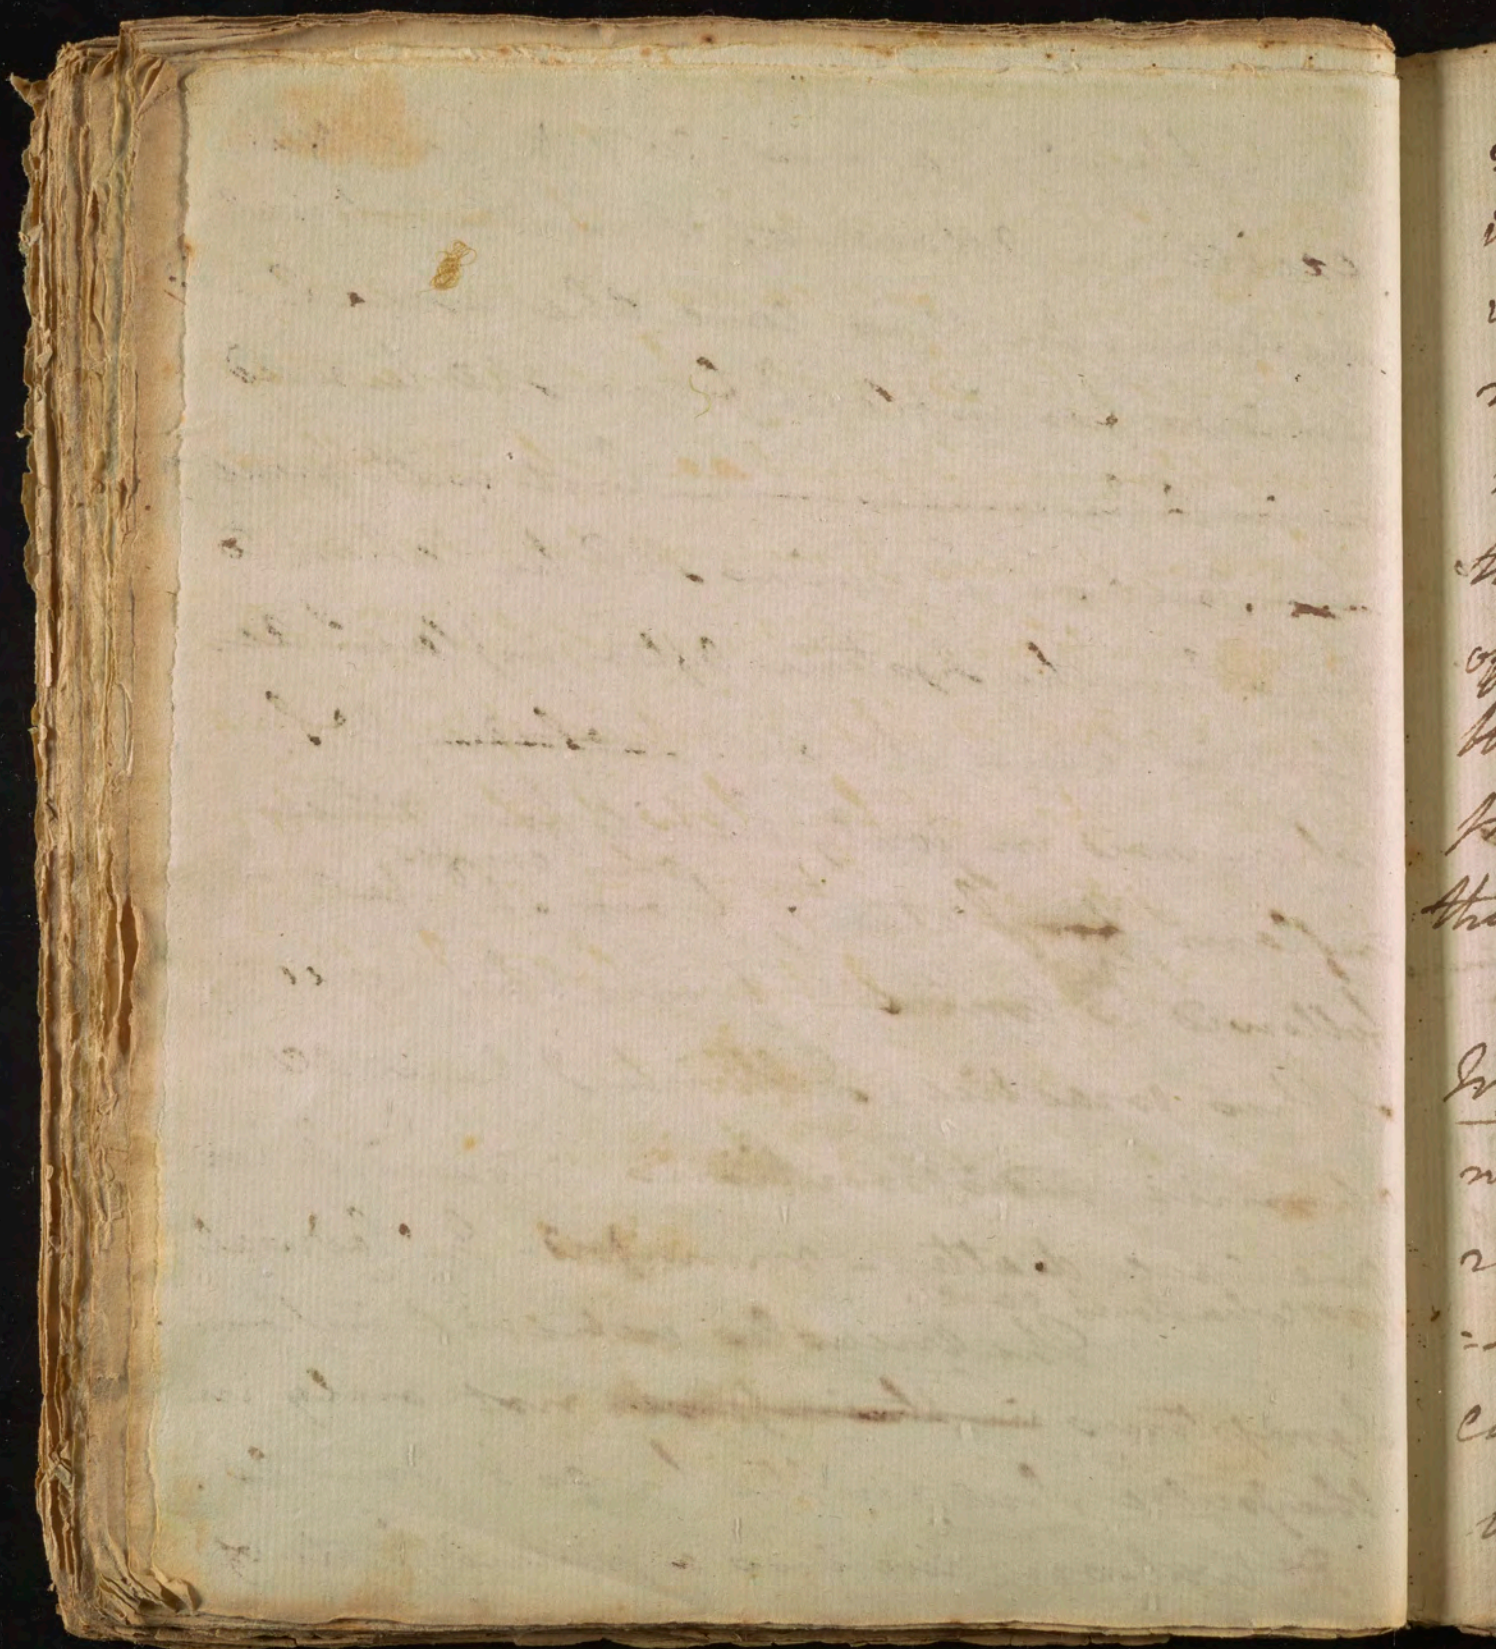

* In the Acute Rheumatism I have
late^{ly} given Calomel wth Advantage
with nitre. I learned the practice from
Dr Hamilton of Lynce Regis. He directs
Opium to be added to the Calomel,
but in this way I found it hurtful.
I have ordered the Joints to be rubbed
wth ~~the~~ ^{the} oil of Turpentine in the acute Rheu-
-matism wth Advantage. A Cabbage leave
gives relief in some cases where Blisters
are objected to, or improper. — also
moleasses &c. v

Cold is highly proper here. The
Rheumatism ^{called the founder is} thus cured in horses.

The gout is partly a disease of the
nervous & partly of the arterial system.

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

[Faint, illegible handwritten text visible on the right edge of the page.]

measles. They were only more highly
inflam^d than usual. ~~W. relieves~~ is
useful in most cases. It not only
relieves the Breast, but cures that
troublesome Diarrhoea which follows
them. It was from a conviction
of the inflam^d nature of this disorder,
that I adopted the practice of preparing
patients for it by low diet, as for
the Small pox. — see 2nd vol. of Enquiries.

The Catarrh from Cold, & the
Influenza from Contagion, are both
moderately inflam^d fevers. They often
require more copious ~~rel.~~ than is pre-
scribed in them, & hence pulmonary
Consumption follows them ^{& the measles} more
frequently than any other disorder.

They require gentle purging, & a large quantity
of diluting decocts to obtain the acrimony in the
system.

✓ I ~~used it in~~ but ~~does~~ did not
~~use~~ use it in a single case in 1774
out of 60, nor in one till after the
middle of Octob^r i.e. out of upwards of 500
in 1780. - It was the breakbone fever.
- It was contagious. The determination
was not as usual to vital parts, but to
the surface of the body, hence, the pains in
the bones. - Antirheumatics & ^{by determining} ~~relieving~~
ointment to the skin were of great use after
a vomit or purge. To encourage this, I ord^d.
the patients to lie in bed. - Blisters ^{are} highly
useful in this state of fever.

The ~~be~~ common bilious vomiting
 fever, sometimes requires vs: but
 it generally yields with ease to
 plentiful depletion by venis, and
 purges. \checkmark It sometimes this ~~is~~ fever

concentrates itself in the bowels forming
~~appears in the form of~~ Colic, and
 Dysentery. again it appears ~~on~~ with
 pain, tension, pain ~~in~~ the liver,

forming what is called Hepatitis.
 This affection of the liver has very
 properly been divided into acute &
chronic. The ~~last~~ ^{former} ~~is~~ ^{succeeds,} ~~first~~ ~~for~~

The latter, ~~pre~~cedes the fever. See
 Giridestine - and other ^{West India}
 writers. But this is not all - ^{this bilious state of} ~~the~~ ^{often}

~~fever often~~ appears with symptoms of
 moderate inflamⁿ in the brain,

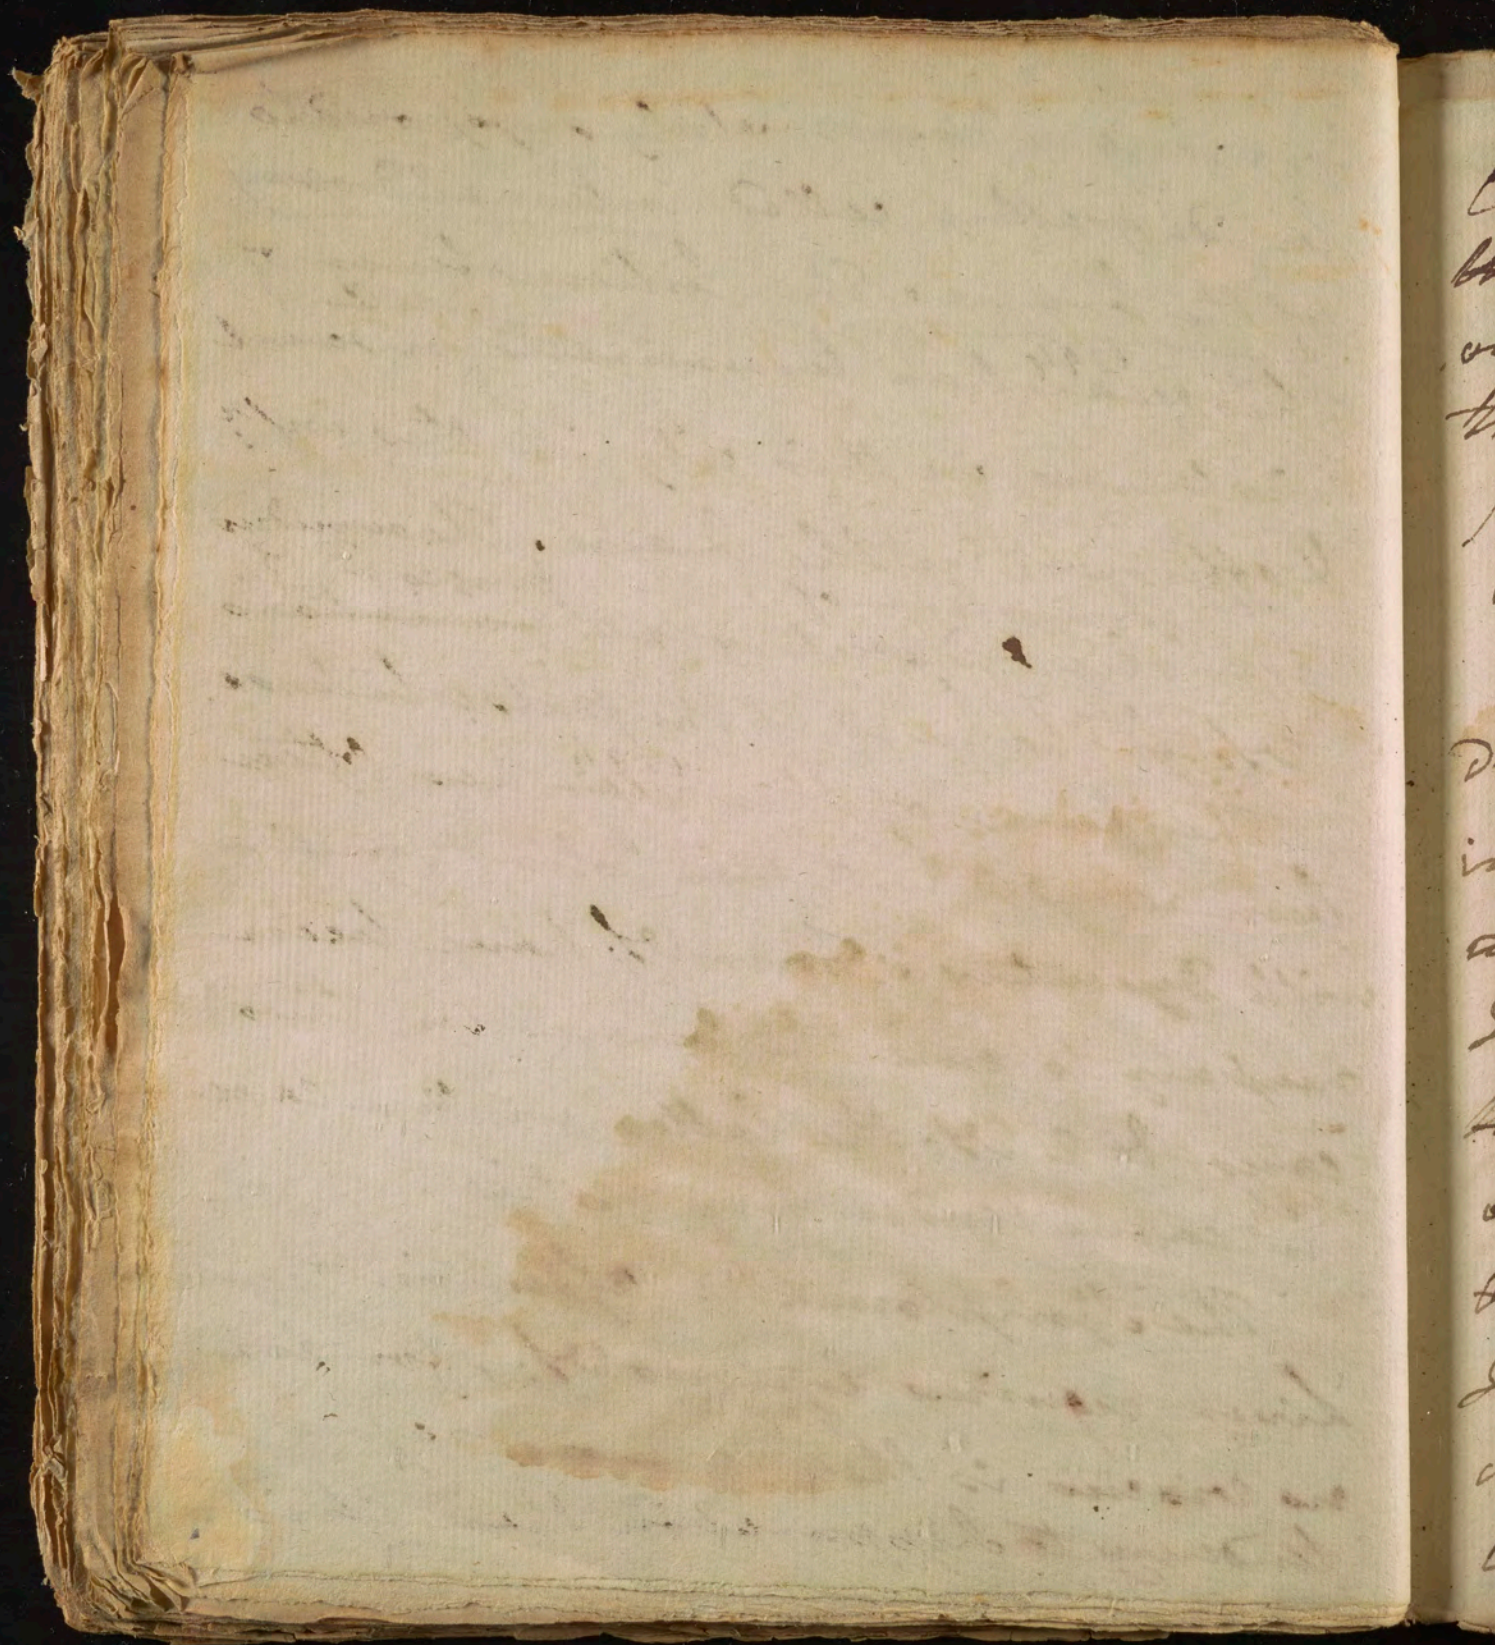

and upon it to adopt my principles

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

forming a disease falsely supposed to
be idiopathic called internal dropsy
of the brain. The bilious fever of
this year ¹⁷⁹⁴ has terminated ^{fatally} in several
instances in this city in this inf.

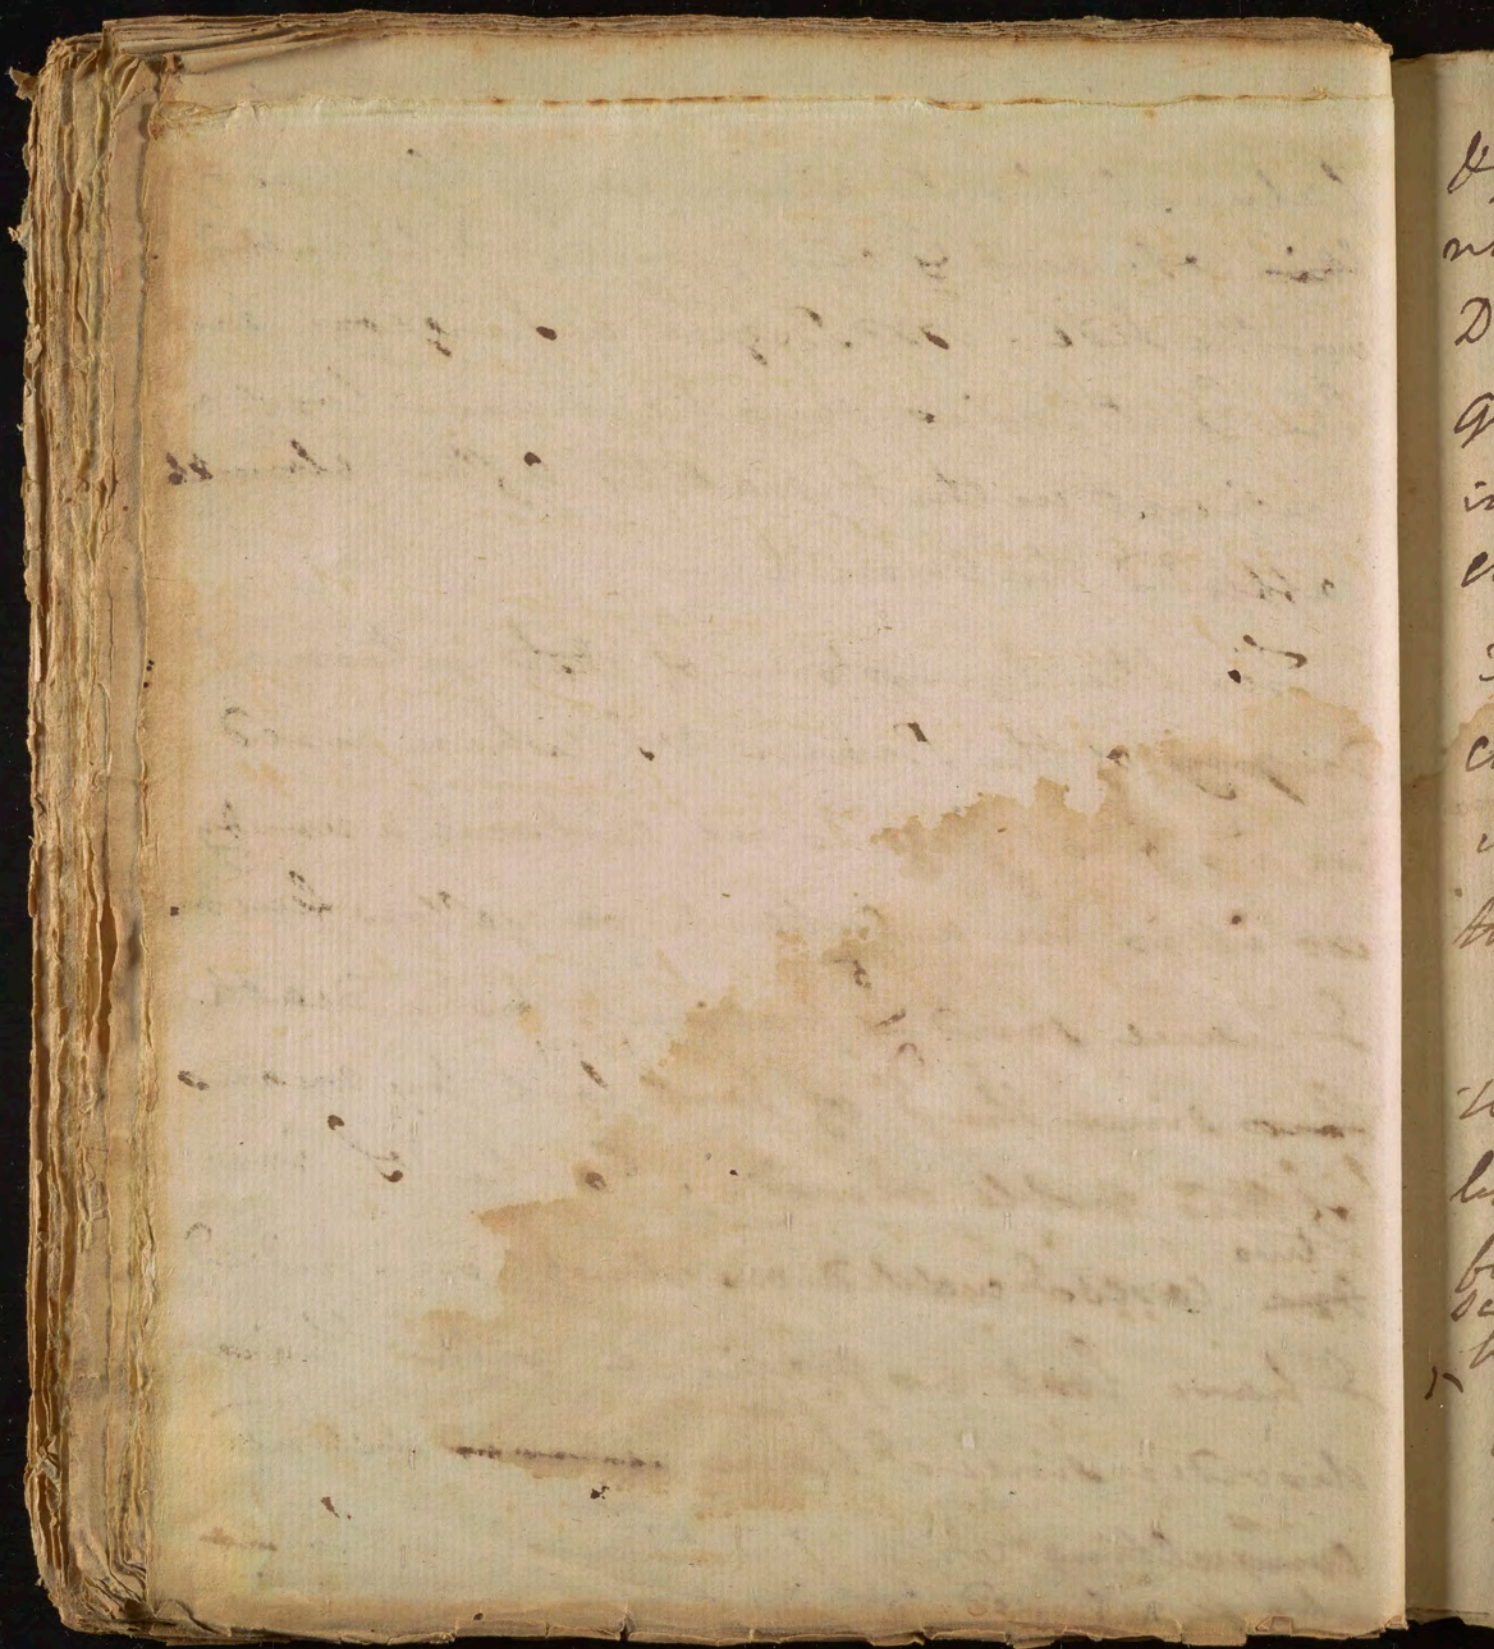

& effusion in the brain. The ^{remedies} ~~remedies~~
^{the symptoms of} for Colic & Dysentery are ^{purgatives} ~~purgatives~~
vs. sh^d be used if the pulse be tense.
— The fever of this year ¹⁷⁹⁴ has often
been attended with this Colic & sometimes
with Dysentery. Four vs. have been
necessary to cure the former in two
cases, & 2 vs. the latter in one case
^{ch} ~~in~~ came under my notice.

The symptomatic affection of the
liver requires copious vs., for in
no viscus is there a more rapid
tendency to suppuration than ⁱⁿ this.
I have resolved to adopt my principles

Calomel should accompany the use of
~~this~~ V.S. and ^{al} ointment ~~th?~~ be rubbed
 on the side. ~~0000~~ Bogue a Surgeon in
 the East Indies, says he never lost a
 patient in the Hepatitis after Calomel
 affected the mouth. —

For the symptoms of ~~V.S.~~ internal
 Dropsy of the Brain V.S. when used
 in its first stage is as certain a remedy
 as it is in a Catarrh or yellow fever.
 I have saved ⁵ ~~4~~ patients from death
~~has~~ since the 3^d of Jan^r ¹⁷⁹⁴ last by means
 of this noble remedy. To the V.S. in
^{two} ~~one~~ cases I added a salivation. Indeed
 I have lost no patient with this
 disorder since I have refused declined
 consulting with Gentlemen who ~~do~~
 have refused to adopt my principles

& practice in the treatment of it. I am
 not singular in ^{these} principles & practice.
 Dr ^{of Dublin} Grice has adopted the former, and Dr
 Griffiths both the former & latter. He
 informs me that he has lately cured a
 child of 5 years old of this disorder by
 3 vs. [It is customary to say of these
 cures - that they were not cases of
 internal dropping of the Brain. Strange!
 that all]

In thus tracing Colic, Dysentery, &
 Hepatitis & Hydrocephalus internus, to
 bilious remitting fever, I know I depart
 from the orthodoxy of medicine. To ^{the}
 Deputy Assistants of a
 horse fly, all the limbs of an oak
 appear to be different different
 trees, but to the eye of a man, they
 all appear to be ~~from~~ homogenous

But in common years, & habits,
V, the ~~best~~ best method of depleting is
this given is by veniits & a salivation.

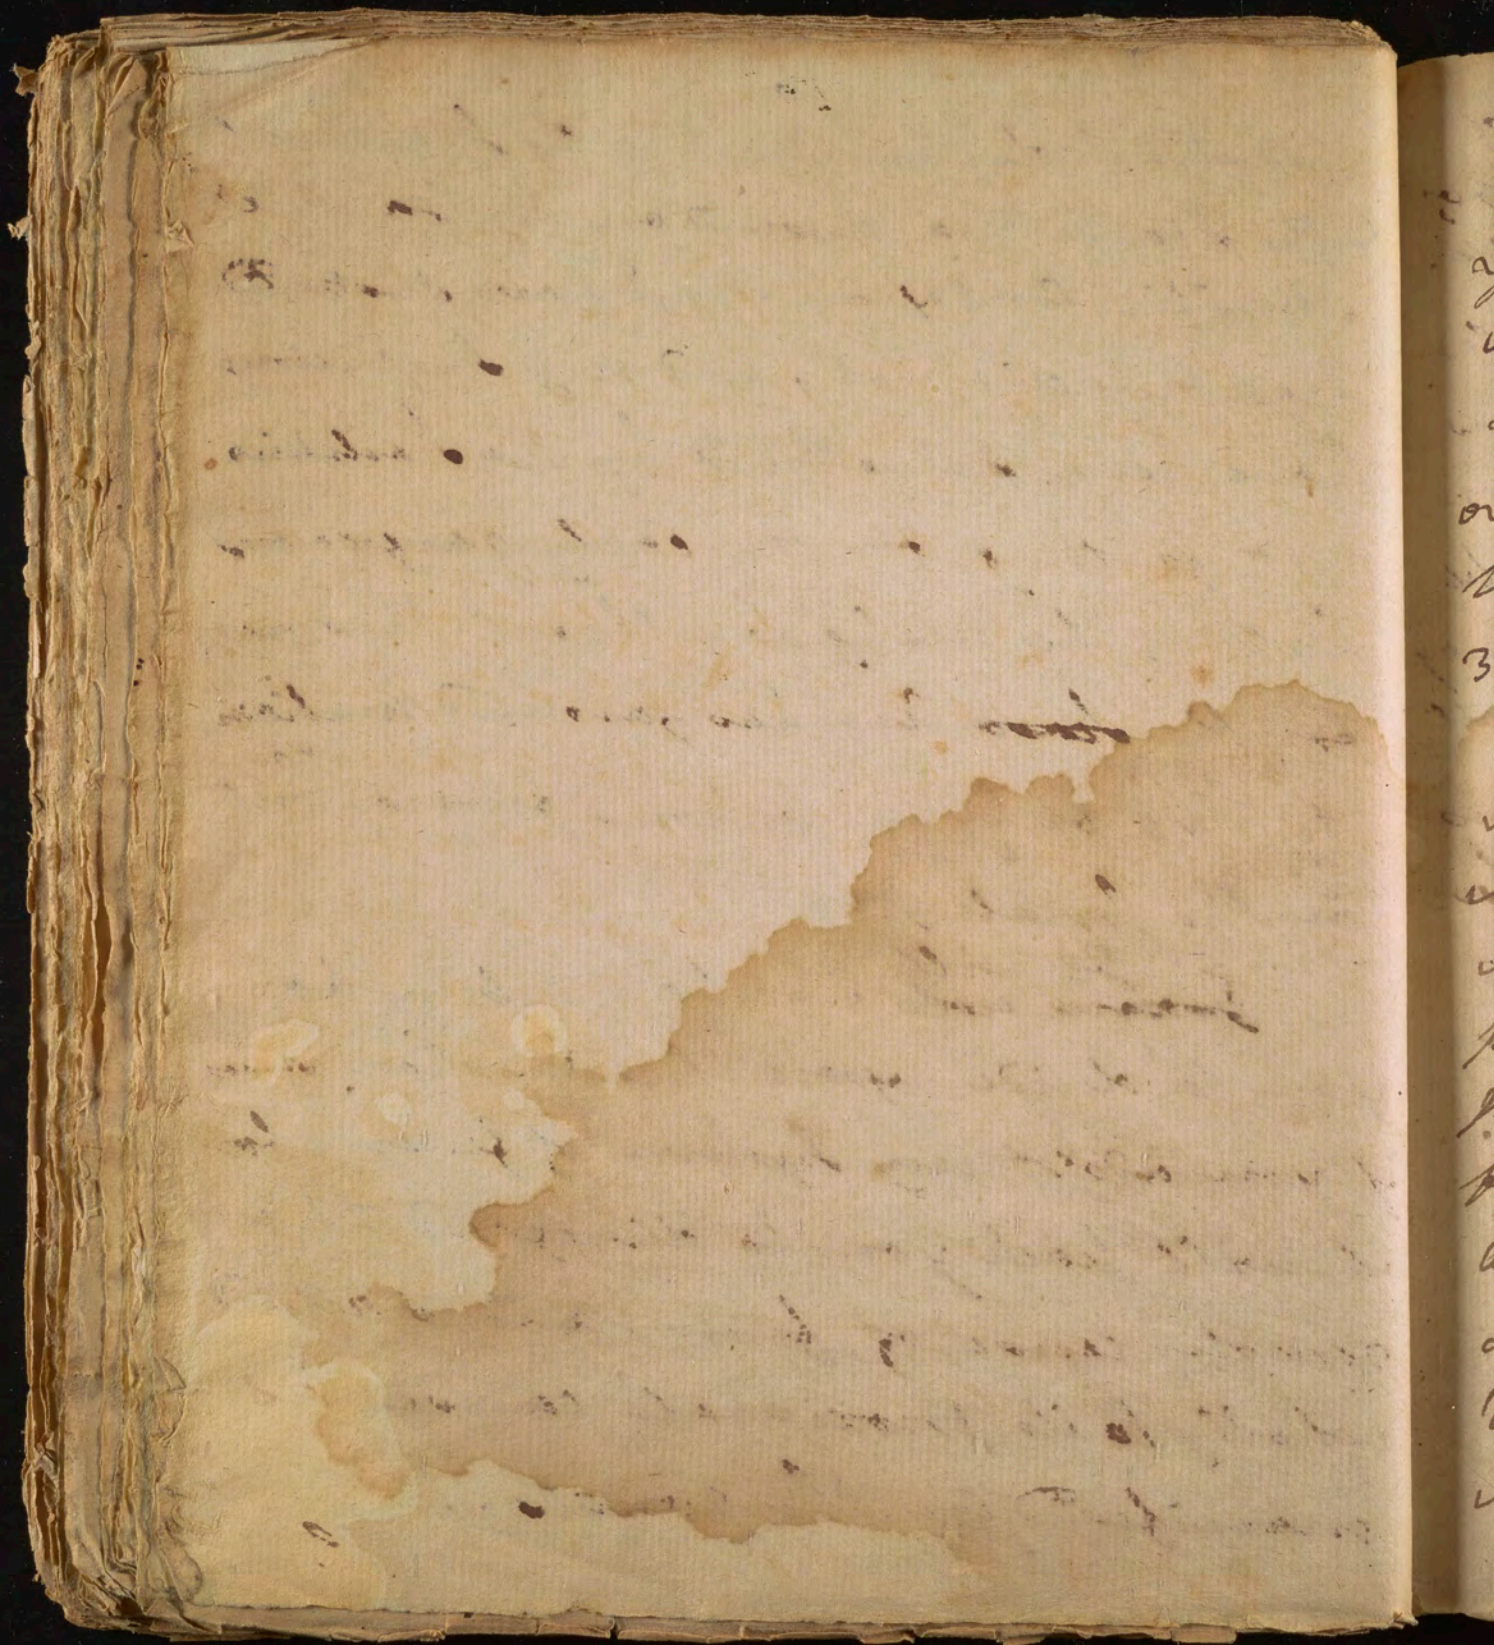

parts of one & the same trunk.

The Scarlatina anginosa, is a state of fever in which a mixed action takes place in the ^{arterial} system - partly inflammatory - and partly typhus - hence the disputes about the proper method of treating it. I have seen in inflammatory & habits the former diathesis prevail so much, as to require it. I have ^{several} years ago bled twice in it. ~~you also~~ This year it has uniformly required it. - The mother's daughter at the hospital (Nov^r 1794) ~~who had this state of a fever~~ from ~~the~~ contagion of ^{the} Scarlatina was bled twice. Her blood was ^{very} ~~very~~ ~~much~~ a question has long been

 very illegible. The
 paper is also very
 thin and brittle.

agitated, whether the malign² Sore throat,
 & the Scarlatina depend on the same
 Specific Contagion. — I have suspected
 that they did not, and my Suspicions
 have been strengthened by the Scarlatina
 not putting on the early gangrenous
 state of the malign² Sore throat this year,
 for the ~~same~~ Air has favoured maligni-
 ty not only in bilious fevers, but
 in the small pox. —

It will
~~I am not~~ not be necessary for
 you to decide upon this question, ~~if~~
 if you adopt my System of fever, for
 it will teach you to disregard the
 remote cause of fever, and to attend
 wholly to its proximate cause as
 manifested in the visits. —

The pneumonic fever in common
years, is attended with the same state
of action in the pulse as the scarletina.

This year the influenza has predominated
over the typhus diathesis. — hence it

has required in many cases two ^{or}
to cure it. ^{the moderate depletion by}
3 bleedings. It generally yields to vomits.

The Electric fever resembles the pneumonic
in the state of action which takes place
in the Arterial System, but it differs from
it, in requiring not bringing any other
parts of the System into sympathy — hence
patients have no pain in this state of
fever, & often eat & drink & even walk
about as in their usual health. It
sometimes, ~~but not~~ often requires
V.S. particularly ~~in~~ when it occurs
in the pulmonary ^{consumption} ~~consumption~~.

The Jail fever most frequently

139
The state is attended with some excess of
action. Infer from the great Utility of
Gonits in strangling it in its forming state.
Heat from King of Phlegm & shorten

+ simplify your ~~ideas~~ of principles
& practice in febrile diseases. In new
fevers as they are called, or in old fevers
with new names; you never can be
puzzled, nor baffled. ~~Disregard, forget, nay~~
~~more, despise the names of fevers in all~~
cases, ~~and~~ govern your Prescriptions
wholly by the state of the Arterial Sys-
tem as ~~as~~ it discovers itself in the
Pulse, and you may disregard, forget,
nay more despise the names of fevers.

The Order of the Remedies is
1. Bleed: 2 Vomiting. 3 purging is better. &
5 Regimens.

Hitherto I have said nothing of
Opium. It is improper in all fevers

comes on with symptoms of Typhus, and in most cases \mathcal{V} . is improper in it, but in some habits & seasons it is absolutely necessary. I have once prescribed it twice, th in advantage in the same patient. That even its weakest \checkmark

The Intermit^t fever in common years seldom requires as ~~much~~ as 20 little cups of action as to require nothing but a Purge or a purge to prepare the blood. repels for the stimulus of the Bark. In the Spring, in the winter, ~~the~~ \mathcal{V} . is indicated. In the course of this ^{few} year, I have met with but Inter-
mittents that I could cure without it. —

Thos Gent: have I gave this a descending Scale of ^{the} inflam^y states of fever. If you admit it, it will ~~thence~~ ^{thence} ~~be~~ ^{be}

in proportion as they are inflamed, for it
certainly stimulates as heat, or sound.
In Pulmonic ~~pneumonia~~ Affections where more
mischief will arise from the irritation
of pain & a Cough, Opium may be given
in small doses with advantage. In Rhinor-
rhoea likewise it may be given with
safety - for here ~~as~~ an effusion produced
by its stimulus cannot endanger life.

~~But in all internal congestions of the~~
In the Dysentery it may ^{likewise} be given to ease
pain & suppress a tenesmus, for here as
~~from~~ in the lungs, an increase of effusion
from stimulus is discharged ~~in~~ into the
Air so as to do no harm. — A hot Bath or
pediluvium proper here? — no — fatal. —
I cannot dismiss this Subject without asking,
Is it not possible to take down inflammation
without the debilitating remedies that have
been mentioned? I answer — that it is probable
it is — & that the time will come when
purgings — purging &c. =
